Studying with a disability or chronic illness

Dear student,

If you have a disability or chronic illness, Utrecht University will support you as much as possible in order to ensure that you complete your programme successfully. Examples of a disability / chronic illness include:

- visual, auditory or motor impairments;
- dyslexia;
- chronic and psychological disorders (e.g. depression, an autistic spectrum disorder, ADD or ADHD, Crohn's disease, diabetes, asthma, rheumatism, or ME / CFS, RSI / CANS, etc.).

In case of doubt whether you are eligible for extra support, please schedule an appointment with a Student Counsellor via [Student Services](#).

Apply via Osiris Cases

If you want to apply for extra support, you can indicate this via Osiris Cases. Osiris Cases is a separate file within Osiris student, the digital registration system of the UU. We kindly ask you to do this as of August 10th. We also ask you to provide evidence concerning your diagnosis. Of course this information will be handled strictly confidential and will only be accessible for the study advisors FSS.

Log in via www.uu.nl/osirisstudent using your solis-id to do so. After you have opened your case in Osiris, you will receive a confirmation via e-mail and the possibility to arrange a meeting with one of the study advisors. Due to the corona measures, this meeting can be arranged through MS Teams.

What kind of support does the university offer?

The study advisor can provide you with the exact details of the options available to you. Further information can also be found on the [Disability or chronic illness](#) page.

If you have any questions you can contact us via e-mail: studieadviseurs.fsw@uu.nl

Kind regards,

Study advisors Faculty of Social and Behavioural Sciences
