STudent REseArch Mobility Programme (STREAM)

**Host University:**
Utrecht University

**Field:**
Health and welfare

**Specified field, subject:**
Toxicology and Environmental Health

**Research project title:**
Risk assessment of chemical, biological or physical agents

**Possible starting month(s):**
Feb, March, April, May, June, July

**Possible duration in months:**
3 to 9 months

**Suitable for students in:** ☒ Bachelor level ☒ Master level

**Prerequisites:**
BSc level knowledge of (bio)medical sciences, preferably with introductory knowledge in toxicology and epidemiology

**Description:**
IRAS (Institute for Risk Assessment Sciences) performs research in the field of toxicology, environmental epidemiology and exposure assessment. Within this institute a wide range of environmental agents are being studied, and their risks for humans and the environment are being assessed. Factors vary from chemical agents, e.g. endocrine disruptors, neurotoxic substances and mixtures in air pollution, biological agents such as endotoxins and zoonoses, to physical agents like electromagnetic fields. A specific research project can be defined together with the student based on his/her background and interests.
Faculty and/or Department:
Institute for Risk Assessment Sciences (IRAS), interfaculty institute
Faculties Medicine and Veterinary Sciences

Contact person:
Please contact your own university for application procedure

Deadline for nomination to reach host university: ongoing

Notification of admission given by the end of:
Three weeks after application
