UNIVERSITY**Host University:**  
Utrecht University**Field:**  
Health and welfare**Specified field, subject:**  
Medicine**Research project title:**  
Advanced clinical epidemiological research**Possible starting month(s):**  
All year**Possible duration in months:**  
4 to 6 months**Suitable for students in:**  Bachelor level  Master level**Prerequisites:**

Prior advanced training in epidemiological and biostatistical methods; advanced knowledge of and skills in advanced methods of clinical medical research, in particular clinical epidemiological research. Experience with theory of design, data collection and data analyses for etiological, diagnostic, prognostic and therapeutic research. Prior experience in writing research papers.

**Description (maximum 2,000 characters):**

During the research an empirical study on clinical epidemiological methods will be designed and conducted. This project will relate more to epidemiological methods than to a particular clinical research fields of interest of the Julius Center. The target is submission of a research paper to a scientific medical journal. The Julius Center for Health Sciences and Primary Care is part of the University Medical Center Utrecht, and carries out groundbreaking research in the field of medicine and health sciences with a strong clinically oriented focus. The Julius Center has four research programs: cardiovascular diseases, infectious diseases, cancer, and methodological research. The Clinical Epidemiology staff of the Julius Center offers the possibility for STREAM projects.
