# PREPARATION

## exchange application process

The application process was relatively easy, but it took a long time to do everything because you had to wait quite long before you got a response from the institutions (both from abroad and the UU).

## counselling & support at Utrecht University

I haven't used this.

## academic preparation

I didn't need to prepare anything academic wise before going abroad.

## language preparation

To get accepted into QMUL into the Law faculty you have to prove your level of English. My diploma wasn't enough so I had to take the TOEFL test and send the results to QMUL after I received them.

## finances

The Finances part was pretty easy. I loaned from DUO and you can get an Erasmusbeurs. This process is quite hard and takes a lot of time and communication, but in the end I got it within a few weeks of being abroad.

---

# STUDY ABROAD PERIOD

## study programme (content and organisational issues)

The programme was very different from my programme at the UU. I usually follow two courses for 8 weeks and another two courses for the last 8 weeks of the semester. At QMUL I followed four courses at the same time for a longer period (a full semester). The courses were very different but therefore refreshing to follow. It was also very different that all courses were mostly lectures instead of real tutorials. Even the seminars were more like lectures; the professor speaks and you listen and take notes.

## academic quality of education activities

The academic quality was pretty high. I would say it was the same as at the UU but sometimes it was harder to follow a lecture because of difficult English legal terms that I wasn't familiar with yet.

## counselling & support at receiving university abroad

I haven't used this.

## transfer of credits

I haven't used this yet but I think they transfer it directly to the UU.

---

# STUDENT LIFE

## welcome & orientation programme

I only joined the tour of the campus and that was fine. They organise a freshers week with parties etc. but I wasn't that interested in those.

accommodation

The accommodation in London is quite easy to find. I really recommend IQ student accommodation. It's expensive but very well organised, clean and safe. They also organise things to get to know fellow students that live in IQ accommodations.

leisure & culture

London is great because there is so much to do. Shoreditch and Kensington are nice areas and there are lots of sightseeing things, nice shops and restaurants etc.

suggestions/tips

Visit all of the big attractions like the London eye etc. but also definitely visit Shoreditch and Camden.

CONCLUSIONS

would you recommend this university/destination abroad to others? please explain

I would definitely recommend London and QMUL as a destination. QMUL is very well organised, especially if you are an exchange student. London is great because you have so much diversity. There are people from all over the world who live and study there so it's easy to make friends. There is also so much to see and to do in London. You've got Oxford street and Bond street, Shoreditch, the London eye, Covent Garden, Picadilly Circus, Camden (market), Mayfair, Regents park, Hyde park, Primrose hill and so on. Everything is connected by the tube and by buses which both go every few minutes and are very reliable and quick.

do you have any additional advice or comments?

If you go to London, purchase an Oyster card when you arrive at a train/tube station. It's the easiest and cheapest way to travel. The replacement for 9292 is Citymapper to find out which bus or tube you need, it is very easy to use and reliable.

PREPARATION

exchange application process

The application process was quite easy. Both universities were quick to reply and everything is explained very clearly. Sometimes the different documents could be a little confusing. I recommend starting early so you don't have to rush to get all the autographs. Especially during summer it can take a bit of time to get everything signed.

counselling & support at Utrecht University

The international office was very helpful and answered all my questions very quickly. It was nice that I could get everything signed digitally, as I had to do most of the paperwork from abroad. This made everything a lot easier.

academic preparation

I did not have to prepare academically before going to London. It's enough to practice your English a little bit.

language preparation

I didn't have to do a test as my final grades from my high school were sufficient. However, I did have to do the additional Erasmus language test to track my improvement (this is a test everyone has to do via internet).
**Finances**

London is very expensive, so as soon as I received the email that I was selected, I started saving up. My parents helped me with my rent (which will be around 800-900 pounds a month) and groceries. I also used my student loan to get around. The Erasmus grant covers about one month’s rent, which helps a lot.

**Study Abroad Period**

### Study Programme (Content and Organisational Issues)

You have to choose 4 modules when you start at Queen Mary. I chose Intellectual Property, Legal Reasoning in a Global Context, Family Law and Labour Law. Within the first two weeks you can change your modules if you wish, but I didn’t do that. For most modules you have lectures and seminars, but not as frequent as at UU. For one module I only had seminars.

### Academic Quality of Education Activities

The modules are very well taught, but it is a bit different from the system in Utrecht. I had some trouble getting into the private law modules, because I was unfamiliar with the UK system, but in the end it was fine. The teachers are very helpful, especially towards exchange students and you can email them about anything anytime. You are expected to do (most of the) reading and to be well prepared during seminars. Instead of exams, I had 4 final essays I’ve had to write.

### Counselling & Support at Receiving University Abroad

The staff was very helpful, you could email them anytime about anything or drop by the office and they would do their best to solve the problem as quickly as possible. There are also a lot of different places you can go, for example the Housing Hub regarding housing questions, the International Office for exchange students and of course the faculty contact person.

### Transfer of Credits

My transcript of records hasn’t been sent yet, but if you pass every course you will receive 7.5 ECTS per course.

**Student Life**

### Welcome & Orientation Programme

I arrived at the beginning of the welcome week, which consisted of various activities. Most of the activities were for first year students, but it was still fun to drop by the society market and go to some parties. I recommend going to the ESN City London introduction activities, this is where I met most of my friends that I spent all my time with. QMUL offers some introduction events for exchange students as well, so there are enough activities to go to and meet new people, and of course to get to know the campus a little bit better.

### Accommodation

I started looking for rooms via sparerooms, and went to London a week in advance to find a room and move in. I recommend taking a friend/family member to help you move. I got my room via Cityrooms by making an appointment at their office, but I would NOT recommend this company. They are very expensive and unhelpful when encountering problems regarding your property. Luckily, my room was fine and my roommates were nice, but I’ve had some friends experiencing problems which they did not solve as easily. Start looking on sparerooms early on and you will find a room for sure, just be careful of the agencies and read your contract carefully. I would recommend finding a student accommodation over going to an agency, even if it is more expensive. I had a room in Bethnal Green, which is a nice area to live in (close to shoreditch and close to the university, while also easy to reach because of the two tube stations and the overground).

### Leisure & Culture
London is an amazing city. There is always something to do. I was very lucky to have met an amazing group of people in my first few days, and every week we would have a million things planned: sightseeing in London, going out to all the clubs, going to pubs or even just having a movie night in with all of us. I would also highly recommend travelling within the UK. We went to Edinburgh and Bath, which was amazing. It doesn’t have to be expensive and it was an amazing time! You won’t be bored in London at all.

**suggestions/tips**

I would really recommend going to the ESN introduction week and getting a room which is close to the university but also close to the city center (Shoreditch/Spitalfields/Liverpool Street, which is close to Mile End (the location of the university)), as this is where you will be spending most of the time and you won’t have to travel far at night because most of the nightlife is in Shoreditch. I don’t recommend getting a room in Mile End or Bow as those neighbourhoods are known to be a little bit more dangerous, and it’s a bit further away from the city center.

**CONCLUSIONS**

**would you recommend this university/destination abroad to others? please explain**

I would highly recommend QMUL as it is a nice university, the full year students are very welcoming and nice and the university is very helpful towards exchange students. London is an amazing city with so much to do, you will really have a great time.

**do you have any additional advice or comments?**

I really recommend going to all the introduction activities, organised by QMUL as well as ESN City London. You will meet a lot of people and make a lot of friends. London is an amazing city to live in, you will never get bored. There are a lot of celebrations such as Bonfire Night, Halloween and all the Christmas markets, the nightlife is amazing and there are many (free!) cultural activities to do as well, such as visiting museums. You won’t regret your choice. Although it is quite an expensive city, I really recommend going here as I've had the most amazing three months of my life!

**PREPARATION**

**exchange application process**

The application process for this exchange consisted of choosing a top three of destinations and writing a motivation letter for your first choice. I was selected for my second choice and did not have to write another motivation letter. In the end I was much happier with my second choice than my first choice fortunately.

**counselling & support at Utrecht University**

The international exchange office was very helpful and quickly to respond in regards to questions and requests considering my application process. This came in very helpful for me as I was almost too late with uploading my learning agreement and therefore needed last minute signatures. However, the exchange office does not have an answer to everything yet in the beginning of the application process as some things need to be discussed with the receiving institution first. For instance, when it comes to the demands regarding your level of English, literally when it was almost impossible to schedule an IELTS language test in due time it turned out I needed to take one. First, it was said that a VWO level of English would be sufficient however this was apparently only the case with a grade of an 8. This was unclear from the Queen Mary University and not from our exchange office.

**academic preparation**
In order to be accepted at the Queen Mary University having a certain average is not one of the demands.

### Language Preparation

As mentioned before, either you need to have an 8 for VWO English or you need to take the IELTS language test, which is quite expensive (231 euros) and which you need to plan ahead almost immediately after your nomination as it takes about 1.5 month before you're able to take the test and not many people succeed the first time. Also, it takes a few weeks to get the results which you need to be able to go on exchange. For this test you need to have an overall grade of a 7 and a minimum of a 6.5 for the writing subject. I took my IELTS test in Amsterdam at the British Language Training Centre.

### Finances

The Erasmus scholarship you get is worth 1092 euros which is by far not enough to compensate how expensive the Pound is compared to the Euro in terms of currency and how expensive the rent and living costs are in the UK in general and especially in London. During your exchange you’ll get the first 80% and after the exchange you’ll get the remaining 20%. Because it was not nearly enough to cover my expenses I had to ask for extra help from my parents a lot. Also, a three month exchange is quite short to go looking for a side job and also you need to focus on getting those credits and enjoy yourself a little bit as well.

## Study Abroad Period

### Study Programme (Content and Organisational Issues)

This exchange is worth 30 ECTS which is equal to four modules each worth 15 credits=7.5 ECTS. This information was also published quite late and had no clue how many modules to choose. In the end I chose Law in Asia, Labour Law, Family Law and Intellectual Property and Related Rights. I actually chose Environmental Law instead of Family Law but this module was fully booked already. Just know that the modules you choose in the Netherlands prior to your exchange are going to be final although they say you can change modules in the first two weeks of you exchange. That is unrealistic because all the popular modules such as Competition Law, Environmental Law and Intellectual Property will be fully booked, you can only change to the least wanted modules such as Law in Asia and something like Comparative Law (on the top of my head).

Law in Asia was the biggest mistake of my life to choose. It turned out not to be anything like law in Asia at all. It was a very philosophical module where there is no right or wrong as long as it is motivated correctly. The module was mostly about orientalism and colonialism. So, if you like history and philosophy this module is perfect however if you'd like to learn about law like me it is not. There are also no lectures and seminars but just one tutorial a week of two hours which is basically a lecture and a seminar all in one given by professor Prakash Shah. To succeed for this module you need to write a 5000 word essay.

Labour Law was not really an area I was particularly very interested in however professor Lizzie Barmes was extremely passionate about her subject and is an excellent teacher. There is a two hour lecture and a two hour seminar every other week. The seminar was also given by the lecturer. I've never met a single teacher who was that keen on getting justice when it comes to her students like her. She explained that the grading scale is from 0 to 100, however, that teachers don’t actually gives grades higher than an 85 (an A++) which is equal to a 10 in the Netherlands. Also, you've passed a module if you get a grade higher than a 38 which is equal to a 5.5 in the Netherlands. For this module you need to write a practice essay from a 1000 words and you need to do a group presentation for 25% of your end grade, the remaining 75% consists of a 4000 word essay.
Family Law was also taught very well. It was lectured by professor Shazia Choudry and the tutorial was given by another woman. Both professors were very clever and funny. It was a two hour lecture and a one hour tutorial every other week. For this module you needed to write two essays of both 2500 words.

I was really impressed by Intellectual Property. This module is very highly rated and given by a very clever professor. The lecture and seminar were given by the same teacher which is very rare in the Netherlands as the lecturer mostly has more important stuff to attend to. There was a two hour lecture and a one and a half hour seminar every other week. This module was my absolute favourite. For this module you need to hand in a practice essay of 750 words and an essay for your grade of 5000 words.

That was actually another thing I had no clue of before I was already in London, namely how my day was going to look like. Turns out it is quite similar to the system in the Netherlands. Every seminar and tutorial is mandatory just as at Utrecht University. Also, you don’t have to do exams, only essays luckily.

It will take about more than 2 months to receive your grades. You will get back from your exchange at the 16th of December and will receive grades on the 21th of October which nobody had told me as I was nervously checking my e-mail everyday for grades.

The equivalent of Osiris will be MySis and Blackboard is QMplus. There is also a QMplus app were you can check your timetable and e-mail.

## Academic Quality of Education Activities

As mentioned above the academic quality is excellent when it comes to most modules. Also, if your thinking about taking extra insessional modules, you won’t have the time. That was another thing, at the very last month of my exchange I was really in shortage of time as the essay assignment for associate students (that’s how they call exchange students) for every module was given at the very last minute and most of them were due just before the departure of your exchange. I was literally typing for my life as the total of 20.000 words for 30 ECTS credits in just about 1/2 months is a lot.....

That was also something I was surprised about, the exchange only lasts barely three months and is for 30 ECTS as when your in the Netherlands you would get the same amount of credits in five months. The pressure at the end was insane.

Furthermore, the law faculty of the Queen Mary University of London is very highly ranked worldwide, it was somewhere around the 30th or 40th place.

## Counselling & Support at Receiving University Abroad

They knew very little in the beginning and I did not know who to call and who to e-mail in the beginning of my application process which was very annoying as I spend quite some days calling around from the Netherlands to lots of phone numbers that did not pick up the phone or just did not know anything. This one time someone even switched me to the campus security on the phone. The person I was apparently looking for is Sheila Shirley. When the exchange finally started they were very helpful at the law office in the law building.

## Transfer of Credits

Your credits will be transferred at the end of February just after your grades will be announced on the 21th of February.

## Student Life

### Welcome & Orientation Programme

Apparantly some parts of this programme are mandatory. I was used to the welcome week in the Netherlands where nothing really is mandatory. They especially want you to come to the parts for the associate students,
this is also a great opportunity to meet other dutch people as there are only a hand full at the entire University. I literally did not meet more than five dutch people.

<table>
<thead>
<tr>
<th>accommodation</th>
</tr>
</thead>
</table>
| Accommodation was very badly arranged for associate students from Europe. Only freshman and associate students from outside of Europe are eligible to apply for campus housing which leaves a gap for associate students from Europe. There are some European associate students who apply anyway and miraculously get a room on campus because there were some spare rooms. I applied anyway as well but there was no extra room.  

The Queen Mary University has a platform where landlords can place adverts if they have a spare room. I messaged lots of landlords. Some respond and others don’t. No landlord ever wants to rent a room to a student who only stays for 3 months, they only want full year students. Therefore it was impossible to find accommodation. In the end I found one landlord who wanted to give me a chance. However, no landlord wants to sign a contract unless you’ve 'viewed' the room in person, which is a bit difficult considering you're in the Netherlands. That’s why I needed to travel to London one week early. I booked a room on Airbnb for the weekend and in that weekend I viewed potential rooms with several landlords.  

Eventually, I signed a contract with Shafique Ahmed, the landlord from 116 Carr Street. Great location, it's only a 10-15 minute walk to either the campus or the tube station. However, the viewing and signing went a bit weird. It was a standard contract printed from the internet which you had to fill in with the particular information concerning this house. The landlord refused to fill the contract in for me, therefore I had to sign a contract where half of the things weren’t documented on paper. I had to bring the 500 pounds deposit in cash which was a bit dodgy, but okay. Then he made a fuss about the fact I did not have a UK bank account and therefore I would take a couple of days for the rent to get to his account in pounds, for this transaction you need to pay the bank 6 euros each time. The room was literally the size of a broom closet with a single bed and I had to pay 620 pounds a month, you actually pay per week in London, but this was the total amount.  

Another thing is that you have absolutely no clue who your roommates are going to be and if they are going to be male or female because everyone rents the room separately and as a girl I ended up living with four guys. I had a great time with them but I would have preferred if I had at least lived with one other girl. Also, getting the deposit back was tricky as well. The landlord did not show up when we arranged a meeting to sort out getting back the deposit. The day of my departure he did show up with the deposit but he tried to rip me off and only give me a 125 pounds back from the 500 pounds total. It was embarrassing he even tried. I had to catch my plane and he had to go to the cash withdrawal machine to get the rest. In the end I got everything back luckily. Another thing to bear in mind is that my landlord lived right underneath us, which would be quite unusuall in the Netherlands.  

Last but not least, another thing that is completely opposite from the Netherlands is that the rooms are fully furnished, however, the bedding is quite gross in most cases. Furthermore, there is nothing of supplies in the kitchen, you need to buy the whole thing: pots pans knives plates cutlery, literally everything, such a waste as students buy this every year again for themselves and then usually throw this away after they move out. That’s why it is more convenient to go by car then by plane to London, in order for you to be able to take those things with you from the Netherlands and also for instance if you would like to bring a hockey stick and stuff which would be special luggage on the plane.  

<table>
<thead>
<tr>
<th>leisure &amp; culture</th>
</tr>
</thead>
<tbody>
<tr>
<td>You should definitely join one of the society’s to gain an active social network. I joined the hockey society and had the best time ever. I made lots of new friends who I’m still in contact with now. We had practice every Monday evening, a match every Wednesday and a mixed game on Sunday. More importantly, we had social events every Wednesday after the game organised by our two social secs which was great and then we usually went to Drapers after (the club on campus). That is very funny as well, the library and the club are very close.</td>
</tr>
</tbody>
</table>
together on campus, therefore whenever you were taking a break in the library in the evening you would run into people heading to the club. This happened quite often as the library is open 24/7 at the Queen Mary.

Moreover, I never played field hockey before and it was no problem at all, there are lots of development players in the UK as it is not such a big sport there as in the Netherlands. The hockey society at the Queen Mary is used to two people from the Netherlands joining their society for a couple of months every year. They all know Utrecht and the basic Dutch jokes for foreigners. It was hard though to find the proper hockey gear, me and my friend had to take an Uber for 1.5 hours until we found a store. All the UK citizens order their hockey gear online. When my Dutch friend and I went back to the Netherlands we arranged a goodbye party for the hockey team and they made a mug with pictures from our time there for us and we got this huge postal card where everyone wrote some kind words for us on there. We are going back to visit them again in May.

suggestions/tips

I would definitely make sure you have a student creditcard if you want to be able to order stuff online as iDeal does not exist in the UK. Also, I would open a Revolut account in order to be able to transfer money to UK bank accounts without additional costs (for a normal bank you'd have to pay 6 euros for every transfer).

CONCLUSIONS

would you recommend this university/destination abroad to others? please explain

I would recommend this university to everyone. I had such a great time and have a feeling there are not many other universities were international students were welcomed like this with open arms, for instance students from abroad are basically ignored in smaller student cities in the UK and not included at all in the everyday life.

do you have any additional advice or comments?

Nope, shared all my wisdom already.

2018-2019

PREPARATION

exchange application process

The exchange application process was not hard to fulfill. It was very clear what you had to do and which deadlines you had to meet. If you keep an eye on your email and Osiris, you will not miss any deadline. Also, the UU is very helpful, as well as QMUL.

counselling & support at Utrecht University

The International Office at Utrecht University is very helpful. You can email them or go by the office with all your questions. They reply to your emails as soon as they can. A lot of signatures, you can also get via the email.

academic preparation

I did not do any academic preparation. Just make sure you practice your English a little before you go. It is not necessary to learn about the English legal system in advance.

language preparation

To get into Queen Mary University, it is required to do a language test. I did an IELTS test, but Cambridge or TOEFL also comply. You need to get a minimum of level B. For me it was not hard. I think when you practice the test online before you do the test, you will pass it. Just bear in mind that you need to book a date for the test in advance. It could take a few weeks before you can actually take the test and you have to finish your application for QMUL before May.
**finances**

From the moment I knew I wanted to go abroad, I started saving money. London is an expensive city, especially the rent is higher compared to Utrecht. I saved up to 3000 euro, and that was enough to pay my rent in advance. Furthermore, I have a student loan which was really helpful during my time in London.

---

**STUDY ABROAD PERIOD**

**study programme (content and organisational issues)**

You have to choose the modules you want to take in advance. However, when you arrive at QMUL, there is enough time to change these modules. My choice of modules had not came through well, but within two weeks of the beginning of the semester, you could add and drop modules. Eventually, I chose Law in Asia, UK Human Rights and Equality and the Law. The modules were all well taught, most of them in small groups (10 people max.). Therefore, it was necessary to prepare well for the tutorials and seminars.

**academic quality of education activities**

The academic quality of the education was comparable to the quality in Utrecht. The level of education is quite high and teachers expect you to be always fully prepared and that you actively participate. The seminars are given in small groups of students. I had a module that only ten students were following. It is therefore necessary that you are always prepared well.

**counselling & support at receiving university abroad**

QMUL is been very helpful from the beginning. When you do not know who to email about certain things, they immediately answer to help you. hen I arrived at QMUL, the Global Opportunities Office kept on being super helpful. So was the law department. When you had a problem with anything, you could just send an email, or pay a visit to the office.

**transfer of credits**

My credits have not been transferred yet, but most modules at QMUL are 15 points there, which is the same as 7,5 ECTS.

---

**STUDENT LIFE**

**welcome & orientation programme**

The orientation programme started already the weekend I arrived on campus. The first weekend was especially for everyone who was going to live on campus. After this weekend, 'Freshers week ' began. During the whole week, a lot of events took place. It is a good opportunity to get to know other (international) students and to get to know the university. There also is a welcome fair, where you can meet all the different societies. I would definitely recommend joining a society, because it is a good way to get to know people and it is a lot of fun.

**accommodation**

I was living in halls (on campus). I really loved it, and it was not that expensive compared to other student apartments in the city. During the application process, I read everywhere that it is not possible for Erasmus+ students and students who only stay for one semester, to live on campus. However, sometimes there are more rooms than students, so there is a chance that you get a room. Just make sure you meet the deadline for applying for a room on campus, otherwise you will be put on a waiting list and you’ll only know three weeks before you go if you got a room. This can cause a lot of stress. If you don’t want to live on campus, or it is not possible, it is good to contact a home agency or visit London for a weekend to look at houses. In the beginning it seems hard to find a room, but you just do not have to give up.

**leisure & culture**
There is so much to do in London. I went to a lot of different restaurants, pubs, bars and clubs with my friends. Also, all the museums in London are free. Furthermore, when you join a society, you have socials. This nights are so much fun and a really good way to get to know all the people in the society better.

**Suggestions/Tips**

Try to find accommodation close to the university. That is eventually where all your friends live, where your lectures are and where university activities take place. The other part of the city you can always explore by tube.

---

### CONCLUSIONS

**Would you recommend this university/destination abroad to others? Please explain**

I definitely would recommend QMUL to other students. The university does everything to make international students feel at home. You can always go to the Global Opportunities Office with questions or inquiries, and they will help you immediately. Also, I would recommend going to London! There is always something to do in the city and you will never be bored. I had an amazing time!

**Do you have any additional advice or comments?**

I would definitely recommend to participate in as many as possible welcome week activities, especially the ones organised for international students. Also, do not hesitate to join a society or more societies. It is so much fun and you make friends really easy. Furthermore, just enjoy living in London. The city has so much to offer and you need to make the most out of it!

Although I had the best three months of my life, I would definitely recommend to go to Queen Mary for the whole year if you have the possibility. One semester at QMUL is only three months, and in my opinion this was just too short to really experience everything.

---

### PREPARATION

**Exchange application process**

At first, I was quite stressed because of all the forms that I needed to fill in. But the support from the UU was great, so everything worked out very well.

**Counselling & support at Utrecht University**

As already mentioned, the support the the UU was great. I could email all my questions or go to the International Office in person.

**Academic preparation**

I did not academically prepare myself.

**Language preparation**

Apart from the preparations for the IELTS-test, I did not prepare myself.

NB: I would recommend to book the test early. I was a bit late and therefore there was some extra pressure on me. If I did not pass the test, I had to go to Brussels in order to make the test before my departure (all the tests in the Netherlands were fully booked by the time I received my result).

**Finances**

I received a grant from the Erasmus+ programme and I saved some money over the years.

---

### STUDY ABROAD PERIOD

### Counselling & Support at Utrecht University

The meetings of the International Office were helpful. Besides, the website provides a lot of information.

### Academic Preparation

I only did the IELTS test. I heard that there are also some Legal English courses at UU.

### Language Preparation

I took the IELTS. You can also choose to do the TOEFL, but the IELTS focuses on British English. You need to get an average of a 7.0 and a 6.5 for writing. You can find some exams to practise the test online. I did not really prepare for the test. I only took a few online exams. The IELTS was not extremely difficult, I managed to pass without a lot of preparation. Don't wait too long to book the test.

### Finances

London is very expensive. I received the Erasmus+ grant and the reimbursement of my student travel product. I also did some savings and I received my student loan from DUO.

### Study Abroad Period

#### Study Programme (Content and Organisational Issues)

I took three courses: United Kingdom Human Rights Law, Law in Asia, Democracy and Justice. I initially chose to do 4, but because of the heavy workload I decided to drop one (Conflict of Laws). A lot of exchange students decided to drop one class. You are allowed to drop one class within the first two weeks. When you choose to go to QMUL for one semester, there is a limited choice for modules.

#### Academic Quality of Education Activities

The quality of QMUL is high. The professors are very helpful and kind. The Law department of QMUL was ranked 3rd in the UK and 1st in London by the Guardian University Guide of 2016. The level of the courses is comparable to Utrecht. There are lectures, seminars and tutorials. This is different for every module. The tutorials are in small groups (8-10 students), so you need to be prepared.

#### Counselling & Support at Receiving University Abroad

They are very helpful and have different possibilities for support. This will all become clear in the welcome week.

#### Transfer of Credits

Our system uses 7.5 ECTS per course, while the UK system uses 15 credits per course.

### Student Life

#### Welcome & Orientation Programme

The welcome and orientation programme was good. There were many events organised for new students. For example, I went to a boat party on the Thames, which was great. Everyone was very helpful and kind. Everything will be explained during the welcome week.

#### Accommodation

Finding a room in London is quite difficult. Fortunately, I got a room on campus. Initially, we've been told that there would be no availability for one semester students. However, I applied for campus housing and got a place. Just try it. Spareroom is also a good option. Be aware of shady agencies.

#### Leisure & Culture

London is amazing. The culture in London is great. All museums are free and the night life is nice. I also visited Cambridge, Dublin and Scotland during my stay in London.

</tbody>
</table>
You will receive a lot of e-mails from Queen Mary during your stay. They are always able to help and are very friendly. I never had a problem at Queen Mary so I do not know them in person.

Transfer of credits

I have not received any grades or information yet.

### STUDENT LIFE

#### welcome & orientation programme

Queen Mary organizes a welcoming and orientation week for all Freshers. Do not expect that much from it, since you are not a real Fresher anymore. However, I really recommend you to go to some of the parties they organize. Especially the Freshers Boat Ball. It was one of the nicest parties I visited during my stay in London.

#### accommodation

I was a bit stressed on fore hand, because I heard that it would be quite hard to find a room in London. Therefore, I contacted an agency (londoncityrooms) and booked a room in advance. It was a super easy way to find a room in a nice neighbourhood close to campus. However, if you have the chance to live on campus, do that since it will save you a lot of money.

#### leisure & culture

There are a lot of things that you can do during your time in London. Visit all the different museums, go to the food markets and clubs and I personally really liked my trips to Cambridge, Scotland and Dublin.

#### suggestions/tips

Apply for a sports society. This gives you the chance to meet new people. I really enjoyed it and it was also a nice way to stay (a little bit) in 'shape'.

### CONCLUSIONS

#### would you recommend this university/destination abroad to others? please explain

Yes! Everything at Queen Mary is well organized and the level of education is very high. Besides that, London is such a nice city where there is always something to do.

#### do you have any additional advice or comments?

It was not quite clear when the semester ended. The website stated that the semester ended during the middle of December. However, you have time to write your dissertations untill the middle of January. Just keep that in mind.

### 2017-2018

#### PREPARATION

Exchange application process

I visited different websites of different universities to orientate, in the beginning it was a bit hard to understand everything because every university uses a different system regarding modules, grades, accommodation etc. It just takes some time and patience to understand how it works and make a decision about your choice of destination but in the end it all works out!

Counselling & support at Utrecht University
I had a few questions concerning how to choose modules and language requirements, therefore I visited the International Office at Utrecht University a couple of times and rang them multiple times and they helped me really well and answered all of my questions.

### academic preparation

I prepared myself academically by looking through the module directories of different universities, the reason why I chose QMUL was because of the modules they offered which were really much in my field of interests. My advice is to look at first at the module directory of the university you prefer to go, because a lot of universities offer modules in a quite specific field of topics which not always suit your academic interest.

### language preparation

I did not really prepare myself linguistically because the spoken language was English so it was not necessary since I already spoke English fluently.

### finances

I received a grant from Utrecht University, and I had a family-loan. Of course it was also possible to receive a student loan from DUO.
### STUDY ABROAD PERIOD

**study programme (content and organisational issues)**

I did a full year exchange, I took four modules that lasted the whole academic year: International Human Rights Law, Law and Globalisation, Criminology and Law, Modernity and the Holocaust. Organisationally it is quite different from the Dutch university system, because there are no exams during the year, so you have all of your exams and essays at the end of the year. This means that you have to revise topics from the beginning of the year, however it is not as though as it sounds because you are quite free in choosing the topics you want to study for your exams, you don’t have to revise every single topic. Also the way of examining is different because the only way of examining there is writing essays, which is really different from the exams at Utrecht University.

**academic quality of education activities**

I am really satisfied with the academic quality and the content of the modules, it gives you definitely a broader academic view and generally a broader view on society and the world. There are loads of extra education activities available at Queen Mary Law faculty, for example a students legal counselling service.

**counselling & support at receiving university abroad**

Almost everything went flawless during my period of studying abroad, and when I had questions about my modules there was an international office at campus, available to help me and answer my questions.

**transfer of credits**

Not applicable yet, I have not received any grades and have no information about the transfer of credits yet.

### STUDENT LIFE

**welcome & orientation programme**

There is an introduction week at QMUL, however this is more focussed on freshers than on exchange students. In the introduction week, all of the different societies (there are loads) present themselves. I joined the womens football society and the boxing society, which was really nice and where I met a lot of people.

**accommodation**

There is no accommodation for European exchange students at QMUL, but there are different Facebook groups you can join to find a room. I got my room through a girl I met in London, I think in the end you can always find something close to University.
### Leisure & Culture

London is full of cultural highlights, there is so much nice stuff to do and see, you certainly never get bored. My experience with people from London is really good, everyone is really nice, friendly and welcoming, there are a lot of different cultures, I felt really at home there.

### Suggestions/Tips

A tip from me would be to look for a room not too far from University, since London is a really big and busy city, I would avoid long commuting times. You can always email me for tips and information about nice neighbourhoods around QMUL. Also I would recommend to join a society which makes it easy to meet other people.

### Conclusions

**Would you recommend this university/destination abroad to others? Please explain**

QMUL is a really nice, multicultural, society-oriented university (for example every month they focus on another problem/topic: Islamophobia awareness month, black history month etc...) and especially the Law faculty at QMUL is really good. They offer a lot of interesting modules, taught by passionate professors.

**Do you have any additional advice or comments?**

Have fun!

### 2016-2017

#### Preparation

**Exchange Application Process**

The application process is quite some work but both the sending and the receiving university provided me with enough information.

**Counselling & Support at Utrecht University**

The meetings with the International Office were helpful, but after that I had to do many things on my own.

**Academic Preparation**

I finished all the courses from the first two years of my bachelor Law in Utrecht.

**Language Preparation**

In order to prepare myself I took an English course at the Babel institution in Utrecht. I think it helped me to get over my insecurities, but when looking back I do not think I really needed it. You do not need an outstanding command of the English language, you will pick it up soon enough once you are there.

**Finances**

I used the Erasmus grant and my savings.

### PREPARATION

**exchange application process**

The exchange application process is quite clear. Queen Mary has Wiebke who is in charge of all the Erasmus and study abroad students and who does her job wonderfully. She sends you emails with everything that has to be done in order to be properly enrolled at Queen Mary. However, the preparations that must be done at home are less clear. Things as applying for the Erasmus grant, financial support, etc. are more confusing and you will have to figure that out on your own. It’s easy enough as soon as you have all the documents, but there will be no emails telling you what to do.

**counselling & support at Utrecht University**

Utrecht University is not as active as Queen Mary in telling you what to do. They are very quick to respond and very willing to help so that makes it easier. You will receive a mail about a pre-departure meeting and about applying for the Erasmus grant, but that’s about it. However, if you contact them with any problems they are very capable and helpful.

**academic preparation**

I took the LEAP (legal English for academic purposes) course. I found this very helpful. Mainly, because we don’t write many English essays and it is very helpful to be reminded of all the rules and proper use of English for these kind of assignments.

**language preparation**

I was obligated to do the IELTS or TOEFL test in order to study at Queen Mary (I did the IELTS test).

**finances**

I saved money and borrowed money from the government in order to pay for everything in London.

### STUDY ABROAD PERIOD

**study programme (content and organisational issues)**

I followed three courses at Queen Mary University. It is normal to do four, however, this is a lot in three months. A lot of students dropped one class in order to have more free time. I took Family Law, Intellectual Property Law and Media Law. When you arrive at Queen Mary for the enrolment it is a bit chaotic but the people are very friendly and will help you with everything. The main problem is that you have to determine which courses you will be taking within the first two weeks of the semester. Once you have chosen these courses it is not possible to change them, or to drop any of them. This makes things a bit unorganised in the beginning, especially with the schedules and online information.

**academic quality of education activities**

The level of the courses is comparable to Utrecht. Here you also have seminars and lectures. However, the seminars are fortnightly. I only had about 4 seminars per course during my semester. The seminars are in smaller groups than you’re used to. Sometimes you’ll be there with 4 other students. This means that you have to be prepared and know your answers. It is different with every teacher, but if you have nothing to add, or say, they will comment on that.

**counselling & support at receiving university abroad**

There is a student information centre at Queen Mary University which can help you with basically any question.
STUDENT LIFE

welcome & orientation programme

The welcome and orientation programme wasn’t that special. There will be a general gathering with a welcome and where they give you the basic information. After that there are some courses you can take, about how to study in the UK and that sort of thing (these are not obligatory..). The best things are the parties that week (go to the erasmus boat party! It’s a great way to meet a lot of people, and an amazing new way to see London).

accommodation

Finding accommodation is difficult in London. Queen Mary does not offer accommodation for one semester students and it is difficult to find short term accommodation. Also, it is much more expensive than you already think it is. I stayed at the Hive in Bethnal Green which is run by a company named Hosts. It was a great place! You have your own nice studio with bathroom and kitchen and you live with other students. There are communal areas and a rooftop (which is pretty awesome, due to it’s view on the London skyline). It was only a 20 minute walk from uni, so I really recommend it. However, it is, as I said, really expensive. There is also Beaumount Court from Unite Students, which is in Camden Town. Also nice rooms (not as fancy as the hive) and it’s a bit cheaper. Another good option is to just go to London for a weekend and use a realtor. They are usually really good and finding decent apartments for a fair price.

leisure & culture

London is absolutely amazing!! There is so much you can do! Make sure you follow things like Secret London and the Timeout on Facebook and you won’t miss a thing. Especially, during the Christmas period London goes completely nuts with lights, christmas markets and ice rings. There are so many fun restaurants and bars to discover and of course there are a lot of beautiful museums and theatres. Also, it is really easy and cheap to visit nearby towns, such as Oxford and Cambridge, which I would also really recommend. It can be nice to escape the crowded city sometimes.

suggestions/tips

Something you must do when you’re in London is visit one of the skyscrapers. Go to the Skygarden (which is free, you just have to get a ticket online), where you’ll have an awesome view of the city. Other options are the Shard or the Heron Tower. The Blueskitchen is also something you don’t want to miss. You can go there for dinner (it’s delicious and relatively cheap) and they have live music (my favourite venue is the one in Shoreditch). Finally, one of my favourite places (only when you have nice weather though!) is Little Venice. It’s a little neighbourhood with a lot of beautiful houses, water and boats. You can even take a tourist boat and go from there to Camden Lock, which is really cool to do. Mainly, because Camden Lock is the amazing food market which is nice place to end your little tour :D

CONCLUSIONS

would you recommend this university/destination abroad to others? please explain

I would recommend Queen Mary University to others. It is a good university with professors who love their fields of expertise. It will be an adjustment because the English legal system is very different from ours, and the courses are also different at QMUL. However, it will be a great experience and you won’t regret it.

do you have any additional advice or comments?

Just go! It’s London!
### preparation

#### exchange/placement application process

It took some steps to apply for the exchange and the Erasmus+ program. I first had to write a motivation letter, study plan, and financial plan to the international office through Osiris. After some time, I received an email from the international office that I am selected for the Queen Mary University of London. Then I also got an email from Queen Mary how to apply and what the requirements where to get in. I had to do an English language test. I choice for the IELTS test.

#### counselling/support at home university

You get a lot of support from Utrecht University. When you have questions you can always email the international office or ask them in person at their desk hours.

#### academic preparation

The only academic preparation is the IELTS test. I did not do anything further.

#### language preparation

Like I said before I choice for the IELTS test. It is not a difficult test; you just have to practice for the time management. You have to get a 7 and above.

#### finances

London is an expensive city to live. The Erasmus+ grant and the duo student grant are not sufficient. You have to have some extra money to spend.

### study/placement abroad period

#### study programme/work plan (concerning content and organisational issues)

This depends on how long you will stay in England. I have chosen for one semester. When you are here for one semester you only have a choice for some modules not al. When you will stay for a whole year you have more chose.

#### academic quality of education/placement activities

The quality of Queen Mary is high. The university is equally as University Utrecht. The only difference is that the exams are at the end of every trimester. It is difficult for a Dutch student, because we are used to the semester system. You have to stay on track with everything otherwise you will have a lot of stress at December when you will stay for one semester or in June if you stay the whole year.

#### counselling/support at host institution/organisation

They help you a lot. At the University they have office hours. That are hours that you can go to the teacher to ask questions if you do not understand some aspects of the module.

#### transfer of credits
The credit system they use is two times the credits of ECTS. So 15 credits in their system is 7.5 ECTS.

**student life**

**welcome/orientation programme**
Everything will be explained in the welcome week of Queen Mary.

**accommodation**
Find a room is very easy, you just have to google and you will find some rooms.

**leisure/culture**
You can do a lot in London. All the museums are free, the have nice clubs and good restaurants.

**suggestions/tips**
Enjoy your time when you are only for one semester, because the time goes very fast. Before you know you have to go back. Furthermore, beside the enjoyment you have to stay on track with the module readings otherwise you will be stressed at the end of term.

**conclusions**

**would you recommend this host organisation/destination to others? please explain**
Yes, I will recommend it, because they have nice activities. The quality of the University is good. And London is a great city very different from the Netherlands. You will meet students from around the whole world.

**do you have any additional advice or comments?**
If you are going just enjoy the experience. It is great!
### PREPARATION

#### exchange application process

Firstly, I had to apply through the website of UU for an exchange abroad. For this I wrote a motivation letter and submitted my marks. After a period of time the UU told me that I was granted a place to go to Queen Mary University in London. After that I received a e-mail from Queen Mary University that I was accepted and that I needed to sign forms in order to confirm my exchange. Furthermore, they required a IELTS certificate with an average of 7.0. After this I had to choose which courses I would follow at Queen Mary.

#### counselling & support at Utrecht University

The UU organised a meeting to tell us more information about the exchange. This was a good opportunity to prepare for your exchange since they gave you useful information about the application process and the requirements. It was also a good opportunity to meet other students who were going to the same university.

#### academic preparation

I had taken courses at UU who were taught in English. This helped me to get used to the English language. I also took online English courses to improve my English in order to pass the IELTS test.

#### language preparation

To be accepted at Queen Mary, they require a IELTS certificate. You need to score on average a 7.0. It would be helpful to buy books specially made to prepare you for the IELTS test. There are also websites (most of them are paid) which help you to prepare for the test.

#### finances

Living in London is very expensive. Not only the rent of your room is expensive, but also other living costs such as transport, leisure activities etc. It would be helpful to lend from DUO or from your parents. Bear in mind that many agents of rooms want you to pay the money for the room in once. The accommodation cost me 6000 euros for three months and the other costs were 1000 euros per month.

### STUDY ABROAD PERIOD

#### study programme (content and organisational issues)

During my stay at the University I followed three modules in law: Intellectual property law, performing the law and competition law. They were interesting modules and I learnt a lot since I did not take any of these modules during my study at my home university. It would be smart to take modules which are ‘international’ since modules which only focus on the law of the UK are not very useful if you do not plan to work in the UK.

#### academic quality of education activities

The teachers were very skilful and they could explain very well. Also during the seminars you were given the opportunity to get involved in interesting discussion. The feedback they gave were also very useful and you learn much from it. Every teacher gave a detailed feedback and a very extensive one.

#### counselling & support at receiving university abroad

The support of the University was very good. You could always walk in and they would help you with any question.

#### transfer of credits
I took 3 modules which were each worth 7.5 ECTS. Bear in mind that each module at the university is worth 15 credits. However, each 15 credits are transferred to 7.5 ECTS.

### STUDENT LIFE

#### welcome & orientation programme

The welcome and orientation programme was very useful. I would strongly recommend to go to this event. During this event useful information is given about the modules and the University in General. Also, useful information is given about London. Furthermore you meet other students which is good for your social skills.

#### accommodation

Queen Mary did not provide any accommodation. Consequently, I needed to find a room by myself. This was very difficult because the owners of rooms want you to rent the room for a full year. My exchange had a duration of 3 months and this was not an option for me. After doing a long research I found a student accommodation called "The Hive". They provided rooms for 4 months (17 weeks). The rooms were studios with your own kitchen and bathroom. The common room was very nice and I met many nice people overthere and the staff was also very nice. It was also very secure, since there was 24/7 security in the accommodation. However, it was very expensive (6000 euro’s for 17 weeks).

#### leisure & culture

Many museums in the UK are free. All of them are very impressive, especially the national Gallery and the natural history museum, and the Victoria and Albert museum. There are also lots of nice restaurants and pubs.

#### suggestions/tips

Ponti’s is a very nice Italian restaurant. Wetherspoons is a very nice pub next to the university. National Gallery Museum, Imperial War Museum, Natural History Museuem, Victoria and Albert Museum are very beautiful museums. Go watch nice musicals, there are lots of them.

### CONCLUSIONS

#### would you recommend this university/destination abroad to others? please explain

I would definetly recommend this university to others. Firstly, the teachers are very nice and they are always willing to help you. Also, everything is very well organised. It is clear what you need to do and how to do it. Furthermore, the university is in London which is an amazing city. There is always something nice to do and you can easily make friends with other students.

#### do you have any additional advice or comments?

Because I was just staying for three months, I did not have to do any exams. Instead, I needed to hand in essays. The essay questions were given very late and in the end of the semester it was very hard to finish the essays. My advise for you would be to ask the teachers to give the essay questions earlier in order for you to have more time to write them. Start as soon as possible, because it is a lot of research. Also, try to book a room very early since it is very hard to find a accommodation in London near to the University. Make sure that you calculate well your finances because London is very expensive.
## PREPARATION

### exchange application process

I had to write a motivation letter and sent it together with my study plan, CV and financial plan to the international office via Osiris. After a while I received an email of the International Office with the message that I was nominated for a place at Queen Mary. Some time later Queen Mary send me the link to the application form. I applied for a place and got conditionally admitted to the programme under the condition that I had to take (and succeed) in a language test before I would arrive.

### counselling & support at Utrecht University

The information provided by the Utrecht University was clear, I didn't need any further support or counselling.

### academic preparation

I didn't do any special academic preparation for my exchange to Queen Mary.

### language preparation

To get admitted you have to succeed in a language test, TOEFL of IELTS. I did the TOEFL exam and had to receive a score of 100 out of 120 point. In my opinion this was not easy (I got a score of 102), but because the English education on secondary schools is already quite good, it should be possible for everyone with a little bit of practice.

### finances

London is really expensive city, definitely compared to Utrecht. Everything, housing, food, and drinks is much more expensive than in the Netherlands. I had to borrow some money of my parents because my DUO study grant (inclusive maximum loan) and Erasmus+ grant were not sufficient to cover my expenses. Be prepared to pay at least around 600 pounds per week for a room. I paid 650 pounds, but some friends were paying a lot more. You probably do not want to worry about money too much during your stay in London, so make sure you have enough available in the case you need it.

## STUDY ABROAD PERIOD

### study programme (content and organisational issues)

As part of my application at Queen Mary, I had to choose the modules I am interested in. Together with the email with the instructions for applying, I received the module outline. This is the overview of modules I could choose from. Since I was only studying there for one semester, the choice was limited and I was allowed to choose from less modules than you can find on the online module directory. If you are studying for the whole academic year, there is much more choice.

### academic quality of education activities

Queen Mary is one of the best Law universities in the United Kingdom. The quality of education is high, but personally I think there is not much difference in the level of academic quality between Queen Mary and Utrecht University. The biggest difference for me was the fact that most of the module only have a tutorial (werkgroep) every other week instead of every week.

### counselling & support at receiving university abroad

The people working at the university are friendly and helpful. If you have any problem or question, you can always contact them, and they reply quite fast. However, due to some technical issues at the university they sometimes send important emails (about admission or my transcript of records) with a delay without notice. You then have to contact them to find out why the mail is delayed.

### transfer of credits
The credit system they use is two times the credits of ECTS. So 15 credits in their system is 7.5 ECTS.

<tr>
<th>STUDENT LIFE</th>
</tr>
</thead>
<tbody>
<tr>
<td>welcome &amp; orientation programme</td>
</tr>
<tr>
<td>The orientation programme for Erasmus+ students took place during the welcome week for all freshers. Although, the Erasmus+ orientation programme took only a couple of hours a day, but this gave us the opportunity to spend the rest of the day with the other Erasmus+ students and get to know each other. There are both informational activities as well as social activities organised. The Law faculty organized welcome drinks for international students, what was really fun. But the International Boat Party on the Themes was absolutely the best thing of this week.</td>
</tr>
<tr>
<td>accommodation</td>
</tr>
<tr>
<td>Finding a accommodation was relatively easy for me. A friend of me studied at Queen Mary the year before me, and via her housing agency I could arrange to rent a room in the same house as she lived in, even before I arrived in London. But most of the people just arrive in London two or three weeks before University starts to look for a room. Almost everyone is able to find a room this way.</td>
</tr>
<tr>
<td>leisure &amp; culture</td>
</tr>
<tr>
<td>In London is always something to do. I can't even think about things you can't do in London.</td>
</tr>
<tr>
<td>suggestions/tips</td>
</tr>
<tr>
<td>The Student Union of Queen Mary is quite big and organizes a lot of activities. Most of this activities are organized by the societies within the Student Union. I would really advice Erasmus+ students to join one of the many societies. It is not only a lot of fun, but it is also a good way to make some friends with the native English students.</td>

<tr>
<th>CONCLUSIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>would you recommend this university/destination abroad to others? please explain</td>
</tr>
<tr>
<td>Living in London is one of the most exciting things I have ever done. Queen Mary University of London is a good university and I would definetly recommend this university to everyone.</td>
</tr>
<tr>
<td>do you have any additional advice or comments?</td>
</tr>
<tr>
<td>I advise students who are intending to apply for Queen Mary, to visit Queen Mary for the whole academic year instead of one semester because the whole system is based on full year modules.</td>
