

## The Time slot model

When registering you must select courses from different time slots to prevent having to take lectures, tutorials or exams at the same time. The time slots allow you to make up your own schedule.

The week is divided into time slots as follows:

TIME SLOT MODEL						
time	day	Monday	Tuesday	Wednesday	Thursday	Friday
09.00-10.45		A1	B1	A4	C6	D4
11.00-12.45		A2	B2	A5	C7	D5
13.15-15.00		C1	C4	D1	B3	D6
15.15-17.00		C2	C5	D2	B4	D7
17.15-19.00		C3	A3	D3	B5	(D8)
19.15-22.00		E1	E2	E3	E4	

### How to use time slots when registering for courses?

You will find the most recent available courses, registration codes and matching time slots in OSIRIS. A course is given in one or two time slots. You select courses from different time slots.

If a course is indicated by a combination of letters (for instance C/D), then the course is in both slots and you have to make sure that your other courses are in the other slots (so A and/or B).

For the bachelor's programme Biomedical Sciences, all the courses are given in the time slot combination AD or BC. This means you can take two courses parallel to each other in each period. The courses are scheduled from 9:00-17:00, the evenings slots are rarely used for our programme.

Course registration in identical time slots is not possible due to overlap in teaching and/or testing. So make sure to register for courses that do not overlap.
