

## How to enroll in your courses as first year student

You have been admitted to the one of our master programs. Congratulations!

- In your first block, you should follow two courses.
- For any mandatory courses in period 3, you will be enrolled automatically.
- For any elective courses, you must enroll yourself.

To be able to enroll, you must fulfil all admission requirements (paying your fees, etc.) by February 15.

Once you have completed all your admission requirements, you are ***fully admitted*** to this program and can enroll in courses yourself.

Go to Osiris, the course management system, and register for an elective course.  
Note: some courses might be overbooked and have limited space available. You can then choose another course and take the original preferred course in your second year.

If you have not completed all your admission requirements yet, your status is ***conditionally admitted***. However, you can (and should!) already enroll in your elective.

Go to Osiris, the course management system to check whether you can enroll. If not, contact the student desk:

- In person (recommended): Minnaert building (1.20.) 10:00 – 12:00
- Information Market on Monday, February 3, at DeVagant building 14:00 – 16:00
- Via email (expect delays) at: [science.gsns@uu.nl](mailto:science.gsns@uu.nl)

The enrollment system closes on February 15. Make sure you log in to Osiris and check your enrollment status before February 15, otherwise you might end up with only one course in your first block.

Make sure to complete all your admission requirements timely. If you have not completed them by March 01, your conditional admission is withdrawn, and you will be de-enrolled from the master program.
