

MORE CHALLENGES COMING YOUR WAY!

Challenge Based Learning
courses after January 2024

- **Dutch Dairy Student Challenge**

Feb - May | 6 EC | B3 + MA

Modern-day dairy farms need new solutions to become more sustainable. Intensive collaboration between diverse students, farmers and stakeholders is needed to enable this transition.

- **BITT (Bio-Med-Tech Nutrition)**

Feb - Apr | 2.5/5 EC | MA

Together we can find high potential patient centered solutions that aim to improve technical, medical and nutritional issues regarding their treatment.

- **Planetary Health and Climate Resilient Health Systems**

Feb - Apr | 5/8 EC | MA

Let's identify new and better relationships between humans and earth's natural systems. This way, society can continue responding to its needs without overburdening the environment.

- **Interuniversity Sustainability Challenge**

Feb - Apr | 5 EC | B2 + B3

What should a city look like at 1.5 degree Celsius temperature increase? Work towards solutions for the city of the future.

Save the date!

Regenerative City Summer School in the summer of 2024

Design a regenerative development zone in Amsterdam by supporting the local community and the land.
