Exam preparation
It's a week before your exam and a lot still needs to be done.

In this animation you will learn what you need to do to make the most of your time and face your exam with confidence!

Hey, don't just start!

We will first get organized.

Grab your course manual and have a look at your notes.

What is this course about?

What are its objectives?

At which level should you master the content?

Do you have a mock exam somewhere?

Take that first, so you know which kind of questions you can expect and which parts you've already got down.

Make a list of topics that are important for the exam.

Try to estimate per topic how well you have mastered it.

Now you can create a plan and set up your learning strategy!

Don't just read or summarize, but make sure you really make the content your own!

Do you need to make connections? Draw a flowchart.

Memorize facts? Use flash cards.

Understand material? Explain it to someone.

There!

With this plan and the right practice strategy, you are set to tackle that exam!
