General information

OSIRIS Case is the digital platform for the entire procedure (application, interim assessment, and final assessment) of research projects, writing assignments, mini-projects and profiles. The profile application is a two-step process. In between the first and second step you must wait a few days before you can complete the application and enter your details accordingly.

This guide provides information about the different steps that are relevant for you as a student. You can access OSIRIS Case via Osiris Student.

You will start a new case for each of the following components: major research project, profile, profile project (if applicable), business internship (only SBM students), mini-project and writing assignment.

Contact information (problems, questions, or suggestions):
- General OSIRIS Case matters: OsirisCaseGSLS@uu.nl
- Administration questions: BMS: infobms@umcutrecht.nl or +31 (0)88 7559397
  Science Faculty: science.gls@uu.nl or +31 (0)30 2531858
- SolisID enquiries: BMS: solisbeheer@umcutrecht.nl
  Science Faculty: servicedesk@uu.nl
1. Prior to starting a case

It is possible to save the application form in the Osiris environment. However, it is recommended to discuss everything beforehand with the intended (host) supervisor/examiner. Especially, in the case of doing a project outside of UU/UMCU/PMC or Hubrecht, as you will require quite some details on your supervisors (examiner, daily supervisor and, if applicable, host supervisor) and must upload an internship contract. Screenshots of all the cases can be found in the Appendix of this document, so you know which information is required for completing your application.

Please note: it is only possible to complete the application if your examiner has a SolisID and certain rights in the system. All UU-employees have a SolisID, but possibly still have to be awarded certain rights to evaluate applications in the Osiris Case environment. If the examiner has problems logging into Osiris docent/case, for UU-employees they can contact science.gsls@uu.nl and for UMCU examiners, the examiner can follow instructions on [here](#). If there are any questions or problems, you may send an email to Osiris Case mailbox OSIRISCaseGSL@uu.nl.

2. Start a case – Application procedure in OSIRIS Case

- Log in to Osiris student.
- Click on 'Cases' ('Zaken' in Dutch)
- This will open a window with your active case. Here you can click on the yellow plus sign to start a new case.
Choose the case type within 'General' that is relevant for you:

- **GSLS Major Research Project or Business Internship**
  Make sure you discuss the details of your Major Research Project with your examiner and other supervisors before you start this application. Press 'start' to start the application procedure.
  
  **Please note:** the Business Internship for Science and Business Management students can also be applied for here!

- **GSLS Mini-project**
  Make sure you discuss the details of your Mini-project with your examiner and other supervisors before you start this application.
  Press 'Start' to start the application procedure.

- **GSLS Profile**
  Make sure you discuss the planning of your GSLS Profile with your programme coordinator before you start this application. Press 'start' to start the application procedure.

- Complete the application form (in the appendix in this document you can find screenshots of all the pages of application forms for each type of project)
- Submit the application

In the case of Profiles, please be aware of the fact that this is a two-step application:

- Select a profile from the menu
- The case will be created after the first submission
• **After the case is created** (this may take a few days), you can fill in the profile application form

Profiles without project: If the profile does not have a project, the case will be finalized after this step. You will receive confirmation that your profile application has been successfully registered.

Project within the profile: If the profile has a project, you will receive instructions after this step to fill in the application form and a task will appear in your system. Click on ‘Profile Project Application Form’ and fill in the required information after discussion with your examiner. Saving in between is possible.

• When the Application form is complete, press ‘Ready’ to submit it
(!) Please keep in mind that for certain profiles, you will still need to register separately for the profile courses. If in doubt, contact the profile coordinator.

3. Monitoring the status of your application

At any time, you can monitor the status of your application and project under the ‘Active cases’ tab. When clicking on the case in the overview you will see the current activity listed. You will see that changing from Student Administration, to examiner, to Programme Coordinator, to Board of Examiners, etc. allowing you to have a clear overview at any time about the procedure.

The different actors involved (e.g., examiner, programme coordinator, etc.) are allowed to request additional information if the application form is not entirely complete. If so, you will receive an email requesting you to add the required information. Once the request is complete:

- The application will be assessed by your examiner
- After this, it will be sent to your programme coordinator for approval
- Subsequently, the Board of Examiners has four weeks to assess the request
- Once approved by all actors, you will receive the approval email of the Research Project coordinator.
4. Interim Assessment form submission

This step is only present during the major research project, business internships and profile projects – it does not apply to writing assignment or mini-project cases.

The interim assessment meeting is an essential step in the project and should take place 2-3 months after the start of the project. After the meeting with examiner and supervisor, you should upload the Interim Assessment form. You will receive an email to remind you of the Interim Assessment deadline.

During the Interim Assessment meeting, you, your supervisor, and examiner can make use of the rubrics. Try to get as much feedback as possible to improve your weaknesses and make the best out of your project.

After uploading the form (1), press ‘Ready’ (2). With Osiris Case, your examiner does not need to include a signature in the rubrics. After your submission, your examiner will receive the notification and will provide approval digitally.
5. (Optional) Rescheduling end date or extending projects
This step is only available in profile project cases – for rescheduling in other cases please contact the research project coordinator.

Rescheduling end date
In certain occasions, you might need additional time to complete the project. If that is the case, you will have the option to request a new end date for the project by uploading a valid motivation. Please, check the information provided in detail and approve the motivation within the case. You can see the valid reasons for rescheduling the end date on the Students’ site. The Research Project Coordinator will check the motivation and approve/reject the request. Fill in the ‘Rescheduling end date form’ and submit it by clicking ‘Reschedule request’.

Extending the project with credits
Some projects provide the option to extend the project with additional credits in those cases where the structure of the project changed, and additional components were added to the initial application. This is only exceptionally approved after the start of the project (check Students’ site). You submit a request for extension with ECs in this step to the Board of Examiners for approval. Fill in the ‘Request extension for credits form’ and submit it by clicking on ‘EC extension request’.
Note: you will see the option for requesting an extension only after the Interim Assessment step has been completed. It is thus not possible to request an extension before the fixed Interim Assessment date.

IMPORTANT: You will always be directed to this step, whether you request an extension or not. After discussing the deadlines with your examiner, please make sure that you click on ‘Ready’ to go to the Final Assessment step.
6. Final assessment — Report submission

For the final assessment, follow the procedure below:

- You will send your final report to your examiner for assessment and schedule your final presentation.
- Your examiner will complete the Final Assessment Form within OSIRIS Case, including:
  1. The plagiarism report (Urkund)
  2. A motivation for the grade (using the Rubrics (preferred) or alternatively a written motivation)
- The second reviewer (internal project or writing assignment) or the supervisor host institute (external project or writing assignment) will receive an automatic email to confirm the grades in OSIRIS Case.
- After the previous steps have been completed, you will receive an email with instructions to upload your final report in the system (1).
- After uploading the final report, press ‘Ready’ (2).

7. Case completed

After uploading the final report, your programme coordinator will be notified and the Master’s Administration Office will register your grades in the system. You will receive an email with the confirmation that the case has been successfully completed.
Appendix 1: Screenshots per case

Below, per application case, you can find the screenshots of the Osiris Case environment. This will be useful for you to know which information is asked before you open a new case.

Major Research Project/Business Internship

---

Please note: you can only complete this application procedure if your examiner has a solis-ID. If your examiner does not have a solis-ID yet, please follow the instructions in the link below and send the solis-ID of your supervisor to the Master administration or enter it in this form:

### Master's programme
- Drag Innovation as of 2021

### Research project type
- Select

### Please select the academic year in which you start your project. For example 2018 is short for 'Aug 2018-Aug 2019' and 2010 means '2010-2011'.

#### Academic year
- Select

### Full-time/part-time (filled automatically)
- Select

### Starting block
- Select

---

MAA-LS-1 is similar to selecting a Teaching Period as with course registration (default).
MAA-LS-2 is only used in exceptional cases and should not be used unless you are instructed to change this field by our Master's Administration.
### Dates and duration of the project

**Start date research project**

- **mm/dd/yyyy**

**Number of weeks spent on courses during research project**

*Specify course titles and dates if applicable*

**Number of weeks spent on holiday or other activities during research project. If you plan to work part-time on your project, please enter here the number of weeks that it will take you extra compared to full-time. For example: if you are a postgraduate Epidemiology student and you have a 94 EC project (which is 48 weeks full-time) and you work 50%, you enter 40 weeks extra here (check your planning for the right number of weeks).**

*Specify dates if applicable*

**Specify the number of EC for the project (please be aware this must match with the research project type above).**

*Select*

**End date research project (automatically calculated based on the information entered above)**

<<Error: no data found>>

* Mandatory field

By signing this document, the student declares to transfer the copyright of any and all products, including the tangible and intellectual products, of the research project to Utrecht University, University Medical Center Utrecht or when the project is performed externally to the host institute. The rights of the student by scientific standards to be a co-author of publications or to be otherwise acknowledged are still recognized.

Complete this form at least 20 working days before starting the Research Project.

Please note: you cannot start your research project without the approval of the Board of Examiners. If you start without prior approval, the time spent without approval will not count for your research project and you may not be assessed.

ASSESSMENT CRITERIA CAN BE FOUND HERE
Has the external institute provided you with their own contract that needs to be signed by the iSLS?

- Yes  - No

In this case you do not need to also sign a GfSIS Internship contract. Please send a copy of the external institute's contract for approval to science.internshipcontracts@uu.nl.

After the external contract has been approved and signed by the GfSIS, upload the signed external contract here.

By signing this document, the student declares to transfer the copyright of any and all products, including the tangible and intellectual products, of the writing assignment to Utrecht University, University Medical Center Utrecht or when the project is performed externally to the host institute. The rights of the student by scientific standards to be a co-author of publications or to be otherwise acknowledged are still recognized.

Complete this form at least 20 working days before starting the writing assignment.

Please note: you cannot start your writing assignment without the approval of the Board of Examiners.

ASSESSMENT CRITERIA CAN BE FOUND HERE

* Mandatory field
Has the external institute provided you with their own contract that needs to be signed by the EUGS?*

- [ ] Yes
- [ ] No
