

ADDENDUM to the two-year Master-EER 2021-2022

ADD TO THE EER OF THE 2-YEAR MASTERS:

Article 2.4 - Admission and conditional enrolment in connection with COVID-19

1. Contrary to the provisions of Article 2.1 (admission requirements for study programmes) and Article 2.3 (admission procedure), the Admissions Committee may admit candidates who meet the following conditions with effect from 1 September 2021:
 - a. The Bachelor's programme or the pre-Master programme has been completed except for a few components of which the total study load does not exceed 15 credits;
 - b. The applicant shall submit an application for admission using the form provided for that purpose by 31 July 2021 at the latest:
 - it is indicated which Bachelor's components or pre-Master's components the applicant was unable to complete;
 - it has been indicated that this delay is linked to the government measures related to COVID-19;
 - a study plan is included in which it is indicated how the applicant will combine the achievement of the missing Bachelor's components or pre-Master's components with attending the Master's programme.
 - c. The candidate belongs to one of the following groups :
 - students enrolled for a Bachelor's degree or a pre-Master's programme at the UU;
 - students enrolled for a Bachelor's degree at another Dutch university (or university of applied sciences if an hbo Bachelor's degree gives access to the Master's degree);
 - students enrolled for a Bachelor's degree at a university in an EEA country;
2. The regulation included in the first paragraph does not apply to:
 - Students who need a visa to study at Utrecht University;
 - The Master's degree programme Development and Socialisation in Childhood and Adolescence (DaSCA).
3. The Admissions Committee assesses:
 - whether the conditions set out in the first paragraph have been met, and
 - whether, in the opinion of the Admissions Committee, there is a studyable programme in combining obtaining the missing Bachelor's components or pre-Master's components with attending the Master's programme.

The candidate who satisfies both conditions will receive a definitive admission decision.
4. The candidate admitted pursuant to paragraphs 1 and 2 must pass the Bachelor's examination or must complete the pre-Master's programme by 1 September 2022 at the latest. If the Bachelor's examination was not obtained before that date or if the premaster programme was not completed before that date, re-enrolment for the Master's programme in the 2022-2023 academic year is not possible.
5. Candidates admitted on the basis of the first and second paragraphs may only take part in the Master's component referred to below if the Bachelor's component referred to below has been completed:

Master component:	Bachelor component:
Master's Thesis	Bachelor's thesis or Pre-Master's Thesis

6. Candidates admitted on the basis of the first and second paragraphs may not take the final examination of the Master's programme if the Bachelor's programme or the pre-Master's programme has not yet been completed.
7. Decisions relating to admission pursuant to this article may be appealed to the Examination Appeals Board. The candidate will be made aware of this in the decision of the Admissions Committee.
