

## Timeslots

Timeslots divide the week in different parts to prevent a clash in course times. It is usually NOT possible to choose courses that are scheduled in the same timeslot. There are incidental cases where courses do not overlap, but more often than not, courses in the same time slot cannot be followed together.

The timeslot model at Utrecht University has five different timeslots (A, B, C, D en E). Each timeslot consists of a fixed number of hours at a fixed moment in the week.

### *The timeslot model*

In each course description, the block and timeslot in which the course will take place is indicated. All courses have their own course code, which is used to register for and deregister from courses and examinations. You will find this course code in the course description as well.

The number of credits you can obtain is shown as well. These credits are calculated according to the European Credit Transfer System (ECTS), the international system for the standard conversion of credits obtained at universities in Europe. One ECTS credit represents 28 hours' study. Per year, at a normal study rate, you can expect to obtain 60 ECTS credits. This means on average students follow four courses of 7.5 ECTS per semester (equals 30 ECTS).
