

Education and Examination Regulations 2021-2022

of the
Master's Degree Programmes

Interdisciplinary Social Science

Study programmes:
Social Policy and Public Health
Youth Studies

Cultural Anthropology

Study programme:
Sustainable Citizenship

Educational Sciences

Study programme:
Educational Sciences

Pedagogical Sciences

Study programmes:
Youth, Education and Society
Clinical Child, Family and Education Studies

Psychology

Study programmes:
Clinical Psychology
Social, Health and Organisational Psychology
Clinical Child and Adolescent Psychology
Neuropsychology
Applied Cognitive Psychology

Sociology

Study programme:
Contemporary Social Problems

within the
Faculty of Social and Behavioural Sciences
at
Utrecht University

The Education and Examination Regulations (EER) contain the programme-specific rights and obligations of students on the one hand and Utrecht University on the other. The (general university) Student Charter contains the rights and duties that apply to all students.

These regulations were adopted by the dean of the Faculty of Social and Behavioural Sciences on 11 May 2021 with the approval of the Educational Committee on 26 March 2021 and the Faculty Council on 11 May 2021.

Part 1

RULES

SECTION 1 – General provisions

Art. 1.1 – applicability of the regulations

These Regulations apply to the academic year 2021-2022 and apply to the education, the tests and the examination of the following Master's Degree Programmes and Study Programmes and to all students who are registered for the Programme as well as to all those who seek admission to the Programmes for the 2021-2022 academic year¹:

Master's Degree Programme:	Study Programme:
Interdisciplinary Social Science	<ul style="list-style-type: none">• Social Policy and Public Health• Youth Studies
Cultural Anthropology	<ul style="list-style-type: none">• Sustainable Citizenship
Educational Sciences	<ul style="list-style-type: none">• Educational Sciences
Pedagogical Sciences	<ul style="list-style-type: none">• Clinical Child, Family and Education Studies• Youth, Education and Society
Psychology	<ul style="list-style-type: none">• Clinical Psychology• Social, Health and Organisational Psychology• Clinical Child and Adolescent Psychology• Neuropsychology• Applied Cognitive Psychology
Sociology	<ul style="list-style-type: none">• Contemporary Social Problems

The Programmes are provided by the Graduate School of Social and Behavioural Sciences within the Faculty of Social and Behavioural Sciences at Utrecht University.

Art. 1.2 – definition of terms

In these regulations, the following terms mean:

- Act, the: the Higher Education and Research Act (Wet op het Hoger Onderwijs en Wetenschappelijk Onderzoek);
- contact hours: contact hours are taken to mean (1) hours spent in class where a lecturer is physically present, such as lectures and tutorials, student counselling, traineeship supervision, tests and examinations, as well as career support in so far as the degree programme schedules these for all students and (2) other structured hours scheduled by the degree programme and which are characterised by contact between the students themselves, either virtually or in real time and/or virtual contact with lecturers;
- course: a unit of study (internship and thesis included) of the degree programme, included in the University Course Catalogue;
- credit: unit, also described as 'EC', whereby one credit is equal to 28 hours of study;
- dean: the dean of the Faculty of Social and Behavioural Sciences at Utrecht University;
- Educational Facilities Contract: the contract concluded by the study programme and the disabled or chronically ill student, which lays down the necessary and reasonable facilities to which the student is entitled;
- examination: the final Master's examination of the study programme that is passed if all obligations of the entire Master's Degree Programme have been fulfilled;
- final mark of a course: the final mark for a course is determined by the weight in percentages of the various subtests;
- Faculty, the: the Faculty of Social and Behavioural Sciences;
- Graduate School of Social and Behavioural Sciences (GSSBS): the School that provides the Master's Degree Programmes within the Faculty of Social and Behavioural Sciences;
- International Diploma Supplement (IDS): the annex to the Master's Degree Certificate, which includes an explanation of the nature and contents of the study programme (partly in an international context);
- Language Code of Conduct: the rules of conduct relating to academic programmes and examinations in languages other than Dutch, determined by the Executive Board on the basis of Section 7(2)(c) of the Higher Education and Research Act;
- Master's Degree Programme: the Master's Degree Programme referred to in Art. 1.1 of these Regulations. A Master's Degree Programme can consist of several Study Programmes;

¹ The EER (Education and Examination Regulations) is reviewed annually and applies to all students registered in the course. If the EER is amended, the new regulations apply to everybody, unless a transitional arrangement applies to a particular group of students.

- n. semester: the period laid down in the university's annual calendar. The academic year consists of two semesters: semester 1 (includes periodes 1 and 2) and semester 2 (includes periodes 3 and 4);
- o. student: anyone who is registered at the university to take courses and/or to sit interim examinations and the examinations of the Programme;
- p. test: interim examination as referred to in Art. 7.10 of the Act;
- q. University Course Catalogue: the register of the courses given by the University which is kept on the responsibility of the Executive Board.

The other terms have the meanings ascribed to them by the Act.

SECTION 2 – ADMISSION

Art. 2.1 – requirements for admission to the degree programme

2.1.1 – Admissibility.

2.1.1.1 - INTERDISCIPLINARY SOCIAL SCIENCE

1. The holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with demonstrable knowledge, insights and skills in the following fields is admissible to the Master's Degree Programme:
 - knowledge of and understanding beyond the social scientific theories of the discipline, or the possibilities and difficulties of combining disciplinary social scientific approaches;
 - knowledge and understanding of various scientific theoretical approaches;
 - knowledge and understanding of a social issue in the field of Social Policy and Public Health or Youth.
2. In the context of that stated in the first paragraph, the following admission requirements must be met for the distinctive Study Programmes in the Master's Degree Programme:

Study programme Social Policy and Public Health

The student will have the following competencies at the academic bachelor level:

- knowledge of and insight into interdisciplinary social science theories, or knowledge of and insight into the possibilities and difficulties of combining various disciplinary approaches within the social sciences;
- knowledge of and insight into quantitative and qualitative social research methods and data analysis techniques at the Bachelor degree level;
- the ability to develop, carry out, analyse and prepare written reports on social science research;
- knowledge of and insight into social issues in contemporary society related to health and wellbeing;
- knowledge of and insight into social policy and intervention theories.

Study programme Youth Studies

The following competencies at academic bachelor level:

- knowledge of and insight into interdisciplinary social science theories, or knowledge of and insight into the possibilities and difficulties of combining various disciplinary approaches within the social sciences about important Youth issues; knowledge and skills regarding quantitative methods and data analysis techniques of social scientific research at Bachelor degree level;
- the ability to set up, carry out, analyse and prepare written reports on social science research;
- knowledge of and insight into social issues in contemporary society related to youth;
- knowledge of and insight into social policy and interventions theories, relevant for Youth studies.

2.1.1.2 – CULTURAL ANTHROPOLOGY

Study programme Sustainable Citizenship

The holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree with demonstrable knowledge, insights and skills in the following fields is admissible to the Master's Degree Programme:

- *Anthropology*: interpret, analyze and solve key (social) issues in anthropology, more specifically theoretical concepts and approaches concerning cultural diversity, citizenship, sustainability and globalization;
- *Research methodology*: design, perform, analyze and report on scientific research in social sciences, with a focus on qualitative research.

2.1.1.3 – EDUCATIONAL SCIENCES

Study programme Educational Sciences

The holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with demonstrable knowledge, insights and skills in the following fields is admissible to the Master's Degree Programme:

- knowledge and understanding of social-science research methods and statistics;
- the ability to set up, conduct, and analyse data, and report on empirical research;
- knowledge and understanding of the development of educational programmes based on educational psychology theories and theories of instructional design;
- knowledge and understanding of change processes in organisations based on theories about innovation and change management;
- the ability to develop and carry out theoretically well-founded evaluations and assessments;
- the ability to engage in various forms of academic writing (e.g., reporting on empirical research, synthesizing theories into a theoretical framework) on the bachelor's level.

2.1.1.4 – PEDAGOGICAL SCIENCES

1. The holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with demonstrable knowledge, insights and skills in the following fields is admissible to the Master's Degree Programme:
 - research competencies: knowledge of and skills in the design, implementation, statistical analyses and reporting of scientific research;
 - knowledge of methods and techniques of scientific research in the social sciences and the ability to apply these;
 - knowledge and understanding of child socialization theories and developmental psychopathology as well as diagnostic assessment and treatment;
 - skills in searching, selecting and processing scientific literature, the ability to critically reflect on knowledge bases and to reflect on this in oral and written form;
 - a communicative attitude and skills required to function well in study groups and in an internship in the Master's programme.
2. In the context of that stated in the first paragraph, the following admission requirements must be met for the distinctive Study Programmes in the Master's Degree Programme:

Study programme Youth, Education and Society

The following competencies at academic bachelor level:

- knowledge and an understanding of theories and perspectives from the social sciences;
- knowledge and understanding of the areas of child rearing and development theory, important societal pedagogical issues in society and the fields of operation for pedagogy;
- knowledge of methods and strategies concerning practical development, practical innovation, intervention and policy processes, including the structure of the pedagogical and educational fields;
- communication and other social competencies required to perform well in an internship in this field;
- academic and analytical competencies: the ability to set up and implement oral and written reports about an analysis of a social pedagogical issue (key questions, backgrounds, considerations and possible solutions);
- competencies in the area of social science research methods and techniques, such as research skills, specific methods of social science research and reporting on research results.

Study programme Clinical Child, Family and Education Studies

The following competencies at academic bachelor level:

- knowledge, insight into and the ability to apply theories and perspectives from the social sciences in general and pedagogical sciences in particular;
- knowledge, insight into and the ability to apply theories and perspectives in the area of diagnostic assessment and treatment;
- the ability to analyse, synthesise and interpret information in scientific articles in the area of social science issues in general and pedagogical issues in particular;

- the ability to set up, implement, statistically analyse and interpret the data gathered from scientific research in the area of pedagogical issues – preferably, but not exclusively, geared towards problematic parenting or learning situations;
- knowledge, insight into and the ability to apply methods and techniques related to social science research – preferably, but not exclusively, applied to pedagogical issues;
- the personal effectiveness required to perform well in an internship setting, for instance one is able to act flexibly, with integrity, with stress resistance and is able to self-reflect.

2.1.1.5 – PSYCHOLOGY

The following admission requirements must be met for the distinctive Study Programmes in the Master's Degree Programme:

Study programme Applied Cognitive Psychology

Admissible is the holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with the following competencies at academic bachelor level:

- the ability to think academically at Bachelor's level;
- the ability to qualitatively or quantitatively measure and/or interpret aspects of human behaviour.

Study programme Clinical Child and Adolescent Psychology

Admissible is the holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with the following competencies at academic bachelor level:

- basic knowledge of the key sub-areas of psychology, such as experimental psychology, developmental psychology, clinical, health psychology and social and organisational psychology;
- the ability to systematically and in a critically constructive way interpret, analyse and solve problems and issues in the foremost areas of psychology, in particular child and adolescent psychology;
 - command of demonstrable and up-to-date academic knowledge in the field of child and adolescent psychology related to normal and deviant development and factors that influence this development, and ability to apply this knowledge to a (fictional) real-life situation;
- sufficient knowledge of and insight into methodology and statistics to be able to assess psychology literature on its merits;
- sufficient practice in conducting scientific research to enable quantitative research to be conducted under supervision in child and adolescent psychology, preferably reflected in a thesis about a study where the entire empirical cycle has been run through;
 - the ability, under supervision, to set up, perform, statistically analyse and report on a social-scientific research project;
- sufficient knowledge, understanding and skills to enable a practical or research internship to be carried out in the area of child and adolescent psychology;
 - the ability to effectively use diagnostic decision-making models, procedures and instruments in relatively simple (paper) diagnostic cases;
 - the ability to critically reflect on own actions and developments in professional practice and discipline and translate the conclusions of this into substantiated initiatives for improvement;
- the ability to communicate (both orally and in writing) clearly and effectively, in a way appropriate to the discussion partner(s) and the specific setting/situation;
- the ability to work together and demonstrate good social skills where required in professional situations (as a basis for developing professional conduct).

Study programme Clinical Psychology

Admissible is the holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with the following competencies at academic bachelor level:

- basic knowledge of the key sub-areas of psychology, such as experimental psychology, developmental psychology, clinical, health psychology and social and organisational psychology;
- intermediate knowledge of clinical psychology and ability to understand complex psychological theories and apply them to the typical problems in clinical psychology;
 - the ability to analyze questions about health and illness with integrity and in a critically constructive way based on recent scientific psychological insights.
 - possession of in-depth knowledge of aetiology, symptomatology and prognoses of adult psychological disorders according to recent insights.
 - the ability to understand and conduct the adult diagnostic examination process from problem to diagnosis and recommendation
- sufficient knowledge of and insight into methodology and statistics to be able to assess psychology literature on its merits;
- sufficient practice in conducting scientific research to enable quantitative research to be conducted under supervision in the area of clinical psychology, preferably reflected in a thesis about a study where the entire empirical cycle has been run through;
 - the ability to independently (with supervision) prepare quantitative empirical psychological scientific research in a scientifically responsible way as well as being able to conduct, report on and evaluate the research in a critically constructive way.
- sufficient knowledge, understanding and skills to enable a practical or research internship to be carried out in the area of clinical psychology;
- the ability to communicate effectively and clearly in a way that is tailored to the other discussion partner(s) and specific setting/situation, and the ability to adequately report on this both verbally and in writing.

Study programme Neuropsychology

Admissible is the holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with the following competencies at academic bachelor level:

- basic knowledge of the key sub-areas of psychology, such as experimental psychology, developmental psychology, clinical, health psychology and social and organisational psychology;
- intermediate knowledge and understanding in neuropsychology and the ability to academically analyse, interpret and solve problems and issues in the area of psychology, and neuropsychology in particular;
- sufficient knowledge of and insight into methodology and statistics to be able to assess psychology literature on its merits;
- sufficient practice in conducting scientific research to enable quantitative neuropsychological research to be conducted under supervision, preferably reflected in a thesis about a study where the entire empirical cycle has been run through;
 - the ability, under supervision, to set up, perform and analyse a scientific research project using the correct statistical procedures and to report on this;
- sufficient knowledge, understanding and skills to enable a practical or research internship to be carried out in the area of neuropsychology;
 - the ability to effectively use neuropsychological diagnostic decision-making models, procedures and instruments in a simple diagnostic case;
 - the ability to act professionally in relation to self, clients and colleagues and work-related tasks and responsibilities;
- the ability to communicate effectively and clearly in a way appropriate to the discussion partner(s) and the specific setting/situation and to effectively report on this both orally and in writing.

Study programme Social, Health and Organisational Psychology

Admissible is the holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with the following competencies at academic bachelor level:

- basic knowledge of the key sub-areas of psychology, such as experimental psychology, developmental psychology, clinical, health psychology and social and organisational psychology;
- advanced academic knowledge of Psychology (i.e. Bachelor exit level) preferably in the field of Social Psychology (including social cognition and attitudes, interpersonal processes, group processes) and/or Health Psychology (including self-regulation, motivation and emotion, health

psychology) and/or Work and Organisational Psychology (including work psychology, organisational psychology, Human Resource Management);

- sufficient knowledge of and insight into methodology and statistics to be able to assess psychology literature on its merits;
- sufficient practice in conducting scientific research to design and conduct quantitative scientific research in the field of Social, Health or Organisational Psychology (under supervision). Students are able to use multivariate statistics to analyse results, and can report and reflect on their research in a critical and constructive manner. This competency should preferably be reflected in a quantitative research thesis in which the student completed the entire empirical cycle.
- sufficient knowledge, understanding and skills to conduct a practical or research internship in the area of Social, Health or Organisational Psychology;
- the ability to communicate in a clear and effective manner, both verbally and in written form, tailored to the other person(s) and the specific setting/situation.

2.1.1.6 – SOCIOLOGY

Study programme Contemporary Social Problems:

The holder of a Dutch academic bachelor's degree, or a foreign academic bachelor's degree that equals the level of that Dutch academic bachelor's degree, with demonstrable knowledge, insights and skills in the following fields is admissible to the Master's Degree Programme:

Social science theories

- knowledge and insight into theory development in one of the social science disciplines and the ability to apply the logic of hypothesis derivation and testing to specific topics.

Contemporary social problems

- the ability to adequately analyse social problems and issues based on the relation between the macro level (social/structural factors) and micro level (individual orientations, decisions and behaviour).

Methods and statistics

- knowledge and insight into methods and techniques related to quantitative research in social and behavioural science.

The admission requirements have been formulated clearly and transparently so that candidates are aware beforehand of the requirements they must meet to be admitted to the programme.

2.1.2 – Selection.

Students will be selected on the basis of objective standards concerning:

- a) previous academic performance in a relevant subject area or relevant subject areas;
- b) relevant skills;
- c) command of the language(s) used in the programme.

This information is used to consider whether the student concerned is in a position of being able to complete successfully the Master's Programme within the nominal time period.

2.1.3 – Neuropsychology programme numerical limitation (numerus fixus)

1. The Neuropsychology programme of the Psychology Master's programme has a numerical limitation. The maximum number of students admitted to the programme will be 65;
2. The admissions committee referred to in Art. 2.3 applies a ranking of the applications submitted based on the criteria stated in Art. 2.1.2 and accepts the admission applications according to the ranking it has established.

Art. 2.2 – English language

Registration for the programme is possible only after it has been demonstrated that the requirement of adequate command of the English language is fulfilled.

Deficiencies in previous education in English can be made up before the start of the study programme by sitting one of the following tests:

- IELTS (International English Language Testing System), academic module. The minimum required IELTS score (overall band) must be: 6.5 with at least 6.0 for the component 'writing';

- TOEFL (Test of English as a Foreign Language). The minimum required TOEFL score is 93 for the internet-based test;
- Cambridge EFL (English as a Foreign Language) Examinations, with one of the following certificates:
 - Cambridge Certificate in Advanced English; minimum score: B;
 - Cambridge Certificate of Proficiency in English; minimum score: C;
 - Cambridge English Advanced (CAE). Minimum score: 176 total, 169 writing;
 - Cambridge English Proficiency (CPE). Minimum score: 180 total, 169 writing.

The holder of an academic university Bachelor's Degree awarded in the Netherlands and the student who completed the Pre-Master's programme from Annex 1 fulfil the requirement of sufficient command of the English language.

Art. 2.3 – admission procedure

1. Admission decisions are made by the Master's Degree Programme's admissions committee.
2. With regard to admission to the Study Programme, the admissions committee examines:
 - the knowledge stated in Article 2.1.1, and the candidate's understanding and skills. In addition to written proof of the programme(s) followed, the committee can have specific knowledge, understanding and skills evaluated by experts in or outside of the university;
 - the candidate's core competencies stated in Article 2.1.2;
 - whether the candidate satisfies, or will satisfy in a timely manner, the stated conditions.
 Based on the above, the admissions committee reaches a decision about the suitability of the candidate for the completion of the final qualifications of the programme with sufficient diligence and within the allotted time.
3. A request to be admitted to the Master's Degree Programme must be submitted before 1 April to the admissions committee. Provided the programme has sufficient capacity, the 1 April deadline will be extended to 1 June. This will be determined by the director of the Master's programme. Requests submitted after this closing date will not be considered. The decision not to consider the request will point out the possibility to appeal to the Examinations Appeal Board.
4. The admissions committee makes a decision within a period of 20 working days from when the complete file has been received. Admission will be granted on the condition that by the starting date of the Study Programme the applicant will have satisfied the knowledge and skills requirements referred to in Art. 2.1, as evidenced by qualifications obtained.
5. The applicant will receive written notification of the admission or rejection to the Master's Degree Programme and the specific Study Programme. The possibility to appeal to the Examinations Appeals Board is pointed out in this notification.

Art. 2.4 – conditional admission decision: premaster programme

1. At the written request of the holder of a Bachelor's diploma of a Dutch University or a Bachelor's diploma of a Dutch University of Applied Sciences (hbo) worth 240 credits, who does not meet the admission requirements stipulated in Art. 2.1, the admissions committee of the Master's Degree Programme concerned will decide whether the requirements can be met by means of a premaster programme developed specially for the Master's Degree programme in question.
2. The holder of a Dutch bachelor degree of a University of Applied Sciences (hbo) worth 240 credits listed in Annex 1 shall be granted admission to the premaster programme for holders of a Bachelor's diploma of a University of Applied Sciences (hbo) described therein.
3. A request to be admitted to the premaster programme must be submitted before 1 May to the admissions committee.
4. If the outcome of the evaluation referred to in article 2.3 is that the candidate does not yet meet the admission requirements referred to in Art. 2.1, but will meet them after having passed a premaster programme tailored to the Master's Degree Programme, the candidate will be given a conditional admission decision.
5. This conditional admission decision will state that the candidate concerned will be admitted to the Master's Degree Programme:
 - a. if the premaster programme with the courses described therein and the study load, expressed in credits, has been passed

- b. within the period of two years. A period of four years applies to students of the part-time programme Educational Sciences.
- 6. The candidate will receive written confirmation of the conditional admission decision, which will point out the possibility to appeal to the Examinations Appeals Board.
- 7. After the conditions referred to in paragraph 5 under a and b have been met, the conditional admission decision will be converted into a definitive admission decision.
- 8. After the expiry of the period referred to in paragraph 5 under b, the student may no longer participate, or participate again, in the premaster programme of Utrecht University.
- 9. The pre-master course referred to in paragraph 1 is open only to candidates who hold the nationality of an EU/EER member state or the UK or Switzerland, or do not hold this nationality but do hold a residence permit that entitles them to statutory tuition fees, and have completed their previous education in the Netherlands.
- 10. The Admissions Committee may deviate from the requirement referred to in paragraph 9 in special cases. In any case special dispensation will be given to refugees with residence status and refugees with a W-card, who have applied for asylum and have not yet received a final decision on their application. Deviation from the requirements is not possible if the candidate requires assistance from Utrecht University in applying for a visa, where the university acts as a sponsor.

SECTION 3 – CONTENTS AND STRUCTURE OF THE DEGREE PROGRAMME

Art. 3.1 – aim of the degree programme

The aims of the programmes are listed in part 2 of these regulations.

Art. 3.2 – attendance mode

These are full-time programmes. The Educational Sciences programme is provided on a full-time as well as a part-time basis.

Art. 3.3 – language in which the programme is taught

1. The programmes are taught in English. This is governed by the Utrecht University Language Code of Conduct. The reason behind the language policy chosen for the degree programme is given in Annex 4.
2. Notwithstanding the provision in the first paragraph, electives may be offered in Dutch.

Art. 3.4 – credit load

The credit load for the programmes is 60 credits.

Art. 3.5 – starting times of the programmes

The Master's Degree Programmes start once a year: on the 1st of September.

Art. 3.6 – composition of the study programmes

1. The programme of study is listed in Annex 2;
2. A Master's Programme comprises (a minimum of) one 5-credit elective. Any Master's Programme course offered by a Dutch university (in Dutch or English) is eligible for an elective;
3. In the University Course Catalogue/course manual the contents and type of courses of the components of the different programmes are described in more detail, stating the previous education required to pass the relevant component.

Art. 3.7 – courses taken at a foreign university

1. Courses offered by a foreign university are (also) eligible for an elective with the approval of the Board of Examiners. The Board of Examiners will decide whether these courses are at a sufficient academic level. The Board of Examiners will withhold approval if it is of the opinion that a replication of content exists in relation to courses already completed by the student. In the event that courses are replicated in terms of their content, either wholly or in part, the Board of Examiners may limit the contribution of these courses to the examination through deduction of credits in proportion to the overlap.
2. The Faculty of Social and Behavioural Sciences will publish on the student site the procedure for contributing courses taken abroad:
 - a. stating at what moment and in what manner students may apply for approval for courses taken abroad;
 - b. giving students the opportunity of applying for approval at such time that they have received a decision from the Board of Examiners by the start of their exchange.
3. Conversion of credits achieved for courses taken abroad is as follows:
 - a. the credits will be taken over for courses provided by foreign universities within the European Union/European Economic Area that work with the European Credit Transfer System (ECTS), which have been approved by the Board of Examiners as regards their

content and level. Contrary to this, the Board of Examiners may decide to award a different number of credits if it is established that the credits awarded abroad do not correspond the study hours.

- b. the credits will be converted for courses provided by foreign universities outside the European Union/European Economic Area that do not work with the European Credit Transfer System (ECTS), which have been approved by the Board of Examiners as regards their content and level, in accordance with the university-wide conversion table See <https://students.uu.nl/en/credit-conversion-table>. The Board of Examiners may deviate from this in exceptional cases if there are good reasons to do so.
4. Conversion of results achieved for courses taken abroad is as follows:
- a. foreign results are converted into the alphanumerical results Pass/Fail; in addition, the original results will be recorded in OSIRIS. Furthermore the original results will be printed on the International Diploma Supplement referred to in Article 6.4 stating the information from Nuffic concerning the grading scales at foreign institutions (<https://www.nuffic.nl/en/subjects/diploma/education-systems>).
 - b. the foreign university will determine where the cut-off score lies for a pass, and records in the transcript whether the student has passed.
 - c. the foreign results will not count towards the student's average final mark.
 - d. the foreign results will not count towards determining whether the student has passes with distinction (*cum laude*).

Art. 3.8 – actual teaching structure

1. The University Course Catalogue or, where the Course Catalogue does not provide this information, the course manual or Blackboard gives the following details relating to each course:
 - a. the learning objectives
 - b. the timetables
 - c. the scheduling of the contact hours
 - d. when and where the course tests and additional or substitute tests take place.
2. Students can view the timetables of the courses, tests and supplementary tests for which they **are registered via MyTimetable.**

SECTION 4 – EDUCATION

Art. 4.1 – courses

All courses which can be part of the study are included in the University Course Catalogue.

Art. 4.2 – preliminary course criteria

The University Course Catalogue/course manual indicates the prior knowledge that is required to successfully participate in each course.

Art. 4.3 – entry requirements of courses

Participation in the following courses of the programme is possible only after the courses listed for it have been passed. The director of the Master's programme decides which motivated claims for dispensation of entry requirement will be awarded.

4.3.1 - INTERDISCIPLINARY SOCIAL SCIENCE

Premaster programmes Social Policy and Public Health and Youth Studies:

Course:	After passing:
Premaster thesis	<ul style="list-style-type: none">• Verdieping in onderzoeksmethoden en statistiek voor interdisciplinair sociaal wetenschappers (VOS ISW) and• Academic Skills and• Risk Behavior and Addiction or Health in Society

Study programme Social Policy and Public Health:

Course:	After passing:
Introduction Masterproject Social Policy and Public Health	Interventions and Policies I: Needs Assessment and Change Approaches or Social Risks in Europe: Protection, Activation and Diversity
Practical Internship SPPH	Interventions and Policies I: Needs Assessment and Change Approaches or Interventions and Policies II: Practical Application
Thesis Based on Existing Data SPPH (TED)	Introduction Masterproject Social Policy and Public Health
Research Internship and Thesis SPPH (RIT)	Interventions and Policies I: Needs Assessment and Change Approaches or Interventions and Policies II: Practical Application and Introduction Masterproject Social Policy and Public Health

Study programme Youth Studies:

Course:	After passing:
Introduction Masterproject Youth Studies	Interventions and Policies I: Needs Assessment and Change Approaches or Youth Studies: an Interdisciplinary Approach
Practical internship YS	Interventions and Policies I: Needs Assessment and Change Approaches or Interventions and Policies II: Practical Application
Thesis based on existing data YS (TED)	Introduction Masterproject Youth Studies
Research internship and thesis YS (RIT)	Interventions and Policies I: Needs Assessment and Change Approaches or Interventions and Policies II: Practical Application and Introduction Masterproject Youth Studies

4.3.2 – CULTURAL ANTHROPOLOGY

Study programme Sustainable Citizenship:

Course:	After passing:
Ethnographic Fieldwork and Thesis	<ul style="list-style-type: none"> • Anthropology of Globalization and Sustainability and Social Contestation and Security, Violence and Sovereignty and • Doing Ethnography and • Research Design

4.3.3 – EDUCATIONAL SCIENCES

Study programme Educational Sciences:

Course:	After passing:
Internship	Learning in Organisations or Instructional Design and Evaluation
Master's Thesis	Learning in Organisations or Instructional Design and Evaluation

4.3.4 – PEDAGOGICAL SCIENCES

Premaster programme Clinical Child, Family and Education Studies:

Course:	After passing:
Thesis	<ul style="list-style-type: none"> • Basis van onderzoeksmethoden en statistiek or Methoden en statistiek van sociaal wetenschappelijk onderzoek and • Verdieping in onderzoeksmethoden en statistiek voor pedagogen or Methoden, technieken en statistiek 3 (MTS-3)

Premaster programme Youth, Education and Society:

Course:	After passing:
Thesis	<ul style="list-style-type: none"> • Basis van onderzoeksmethoden en statistiek or Methoden en statistiek van sociaal wetenschappelijk onderzoek and • Verdieping in onderzoeksmethoden en statistiek voor interdisciplinair sociaal wetenschappers (VOS ISW) or MTS-3: Data-analyse

4.3.5 – PSYCHOLOGY

Psychology has no entry requirements.

4.3.6 – SOCIOLOGY

Study programme Contemporary Social Problems:

Course:	After passing:
Internship and Labour Market Preparation	<ul style="list-style-type: none"> • Policy Research and Advice • Sociology: Theory and Research • One of the three tracks with the two corresponding required track courses. <p><i>Track Criminology and Safety:</i></p> <ul style="list-style-type: none"> • Criminology and Safety (Theories, Trends and Policies) • Internet, Social Media and Networks or Essentials of Care: Analyzing Current Policy Trends <p><i>Track Internet, Social Media and Networks:</i></p> <ul style="list-style-type: none"> • Internet, Social Media and Networks

Course:	After passing:
	<ul style="list-style-type: none"> • Essentials of Care: Analyzing Current Policy Trends or Criminology and Safety (Theories, Trends and Policies) <p><i>Track Essentials of Care:</i></p> <ul style="list-style-type: none"> • Essentials of Care: Analyzing Current Policy Trends • Internet, Social Media and Networks or Criminology and Safety (Theories, Trends and Policies)
Master's thesis	<ul style="list-style-type: none"> • Policy Research and Advice • Sociology: Theory and Research • One of the three tracks with the two corresponding required track courses. <p><i>Track Criminology and Safety:</i></p> <ul style="list-style-type: none"> • Criminology and Safety (Theories, Trends and Policies) • Essentials of Care: Analyzing Current Policy Trends or Internet, Social Media and Networks <p><i>Track Internet, Social Media and Networks:</i></p> <ul style="list-style-type: none"> • Internet, Social Media and Networks • Essentials of Care: Analyzing Current Policy Trends or Criminology and Safety (Theories, Trends and Policies) <p><i>Track Essentials of Care:</i></p> <ul style="list-style-type: none"> • Essentials of Care: Analyzing Current Policy Trends • Internet, Social Media and Networks or Criminology and Safety (Theories, Trends and Policies)

Art. 4.4 – registration for courses

Participation in a course is possible only if the student has registered for it on time ².

Art. 4.5 – course participation

It is not possible to re-take a course for which a pass mark has already been earned.

Art. 4.6 – courses taking place

All courses mentioned in the University Course Catalogue must take place at all times. If fewer than ten students enrol for a course, however, the course coordinator, in consultation with the director of the Master's programme and the students, may decide to offer the course in an altered form in terms of working and examination methods, or to offer an alternative course.

Art. 4.7 – attendance obligation and obligation to perform to the best of one's ability

1. All students are obliged to participate actively in the course for which they are registered.
2. Besides the general requirement for students to participate actively in the course, the additional requirements for each course are listed in the University Course Catalogue/ course manual.
3. In the event of qualitatively or quantitatively inadequate participation, the course coordinator and/or the director of the Master's programme may exclude students from further participation in the course or part of it.

² This only applies if the student is not automatically registered for the course.

Art. 4.8 – causing a disturbance while participating in the course

1. Students who cause a disturbance during the course, after being warned, may be removed by the lecturer. The course coordinator will then set up a meeting with the students to discuss their behaviour.
2. Students who repeat the infringement, may be excluded from the course by the course coordinator.

Art. 4.9 – evaluation of quality of the education

1. The education director is responsible for monitoring the quality of the education. To this end the education director will ensure that an evaluation of the courses is made, as well as an evaluation at curriculum level. In this quality control of the courses the education director will draw on the advice and suggestions for improvement of the education committee on promoting and safeguarding the quality of the course.
2. The education in the study programmes will be evaluated in the following manner:
 - a. interim evaluation in the course: during the course the students can provide feedback on aspects that could possibly be different or better. Interim evaluation is not compulsory;
 - b. course evaluation: at the end of the courses, the participating students are asked for their opinion on the quality of the contents, educational structure, study materials, testing and lecturer(s) based on standard evaluation forms, whereby several questions, at own discretion, can be complemented by the study programme;
 - c. evaluation at curriculum level based on standard evaluation forms, whereby several questions, at own discretion, can be complemented by the study programme;
 - d. by means of the National Student Survey (*Nationale Studenten Enquete – NSE*) the students will be asked for their opinion on all aspects of the education and the facilities.
3. Students who have participated in the course will be informed of the results of the course evaluation.
4. The changes made and measures taken in response to the course evaluation will be explained in the course of the academic year 2022-2023.

SECTION 5 – TESTING

Art. 5.1 – general

1. During the course, the student will be tested for academic schooling and the extent to which the student has sufficiently achieved the learning objectives set. The testing of the student will be concluded at the end of the course.
2. The University Course Catalogue describes the achievements the student must make in order to pass the course and the criteria on which the student is assessed. These criteria can be made more explicit in the course manual.
3. The testing procedure is described in the Regulations of the Board of Examiners.
4. There is no testing in the month of August.

Art. 5.2 – Board of Examiners

1. For each academic programme or group of programmes, the dean will set up a Board of Examiners and will put in place sufficient guarantees that this Board will work in an independent and expert manner.
2. The dean will appoint the chair and the members of the Board of Examiners for a period of three years on the basis of their expertise in the field of the programme(s) in question or the field of examining, whereby:
 - at least one member shall be from outside the relevant (group of) programme(s), and
 - at least one member is, as a lecturer, affiliated with the relevant (group of) programme(s).Re-appointment is possible. Before making this appointment, the dean will consult the members of the Board of Examiners concerned.
3. Persons holding a management position with financial responsibility or (partial) responsibility for a programme of study may not be appointed as a member or chair of the Board of Examiners. This will in any event include: the dean, vice-dean; the Director/Head/Manager of a department; a member of a departmental management/administrative team; the Director/Head/Manager of a section; any member of a management or administration team; a member/chair of the Board of Studies of the Graduate School or the Undergraduate School and the Director of Education.
4. Membership of the Board of Examiners will terminate upon expiry of the period of appointment. In addition, the dean will discharge the chair and the members from their duties at their request. The chair and the members will also be dismissed by the dean in the event that they no longer fulfil the requirements stated in paragraphs 2 or 3 of this article. In addition, the dean may dismiss the chair and the members in the event that they fail to perform their statutory duties adequately.
5. The dean will make the composition of the Board(s) of Examiners known to the students and teaching staff.

Art. 5.3 – assessment: internship or thesis

1. An internship is assessed by the UU-supervisor in question and one or more other internal and/or external experts.
2. Master's thesis will be assessed by two lecturers.

Art. 5.4 – marks and alphanumeric results

1. Marks are awarded on a scale from 1 to 10. A mark 6 and up means the student has passed the course, a mark 5 or lower means the student has failed it.
 - fails up to a 4.99 are not rounded up
 - 5.00 to 5.49 = 5
 - passes are rendered in whole marks or in .5 marks.

The rounding up and down is as follows.

Fail:

1.00 – 4.99 are not rounded up
5.00 – 5.49 = 5

Pass:

5.50 – 6.24 = 6
6.25 – 6.74 = 6½
6.75 – 7.24 = 7
7.25 – 7.74 = 7½
7.75 – 8.24 = 8
8.25 – 8.74 = 8½
8.75 – 9.24 = 9
9.25 – 9.74 = 9½
9.75 – 10 = 10

If the next decimal ends up at a 5 or more, the mark is rounded up; if the next decimal is a 4 or lower the mark is rounded down.

2. Alphanumeric results can be awarded in the following cases:
 - ND (niet deelgenomen - not participated): the student is enrolled in the course, but has not participated;
 - ONV (onvoldoende – not sufficient) or NVD (niet voldaan – not complied): the student has not participated in all the test modules or has not satisfied the requirement of all partial tests;
 - V (voldaan/voldoende – complied/sufficient): the student has complied with a module, but has not received a mark on the scale from 1 to 10 for it;
 - VR (vrijstelling – exemption): the student has been granted exemption by the Board of Examiners;

Art. 5.5 – make-up: additional or substitute test

1. If students have fulfilled all obligations to perform to the best of their ability during the course, and they are nonetheless awarded a failing mark, but the final mark is at least a 4.0, without rounding up, they will be given a once-only possibility to sit an additional or substitute test.
2. Students do not qualify for an additional or substitute test if they have been awarded a pass.

Art. 5.6 – type of test

1. Testing within a course is done in the manner stated in the University Course Catalogue. This will be made more explicit in the course manual.
2. At a student's request, the Board of Examiners may allow a test to be administered otherwise than as stipulated in the first paragraph.

Art. 5.7 – oral testing

1. Only one person at a time may be tested orally, unless the Board of Examiners decides otherwise.
2. Oral tests will be administered in public, unless the Board of Examiners or the examiner in question decides otherwise in a special case, or the student objects to this.

Art. 5.8 – extra test

1. The director of the Master's programme may decide to grant an extra test if not providing for an extra test would result in a 'special case of manifest unfairness'.
2. Requests for an extra test must be submitted to the director of the Master's programme offering the course before the start of the regular or additional/substitute test.
3. Article 5.5 shall correspondingly apply to the extra test referred to in the first paragraph. This means that the student who misses the regular exam of the course due to force majeure and sits the exam by means of an extra test will be able to take a supplementary or replacement exam if the student fails the final assessment with a score of at least an unrounded 4.0.

Art. 5.9 – time limit for grading tests

1. The result of an oral test must be determined and communicated to the student within 24 hours.
2. The examiner must ensure that the results of written and other assessments are available to the student within 10 working days of the date of the assessment.
3. If the mark is not available within this period of time for reasons of force majeure, the examiner must communicate this to the student, indicating when the mark will be determined. Force majeure can only be established by the course coordinator.
4. The written statement of the mark achieved must inform the student of the right of inspection as referred to in Art. 5.11 and of the option to lodge an appeal with the Examinations Appeals Board.

Art. 5.10 – period of validity

1. The term of validity of courses passed is unlimited. Contrary to this, the Board of Examiners may impose an additional or alternative test for a course, the test for which was passed more than five years earlier, if the knowledge or understanding being examined is demonstrably out of date, or if the skills being examined are demonstrably out of date.
2. The period of five years referred to in paragraph 1 will be extended by the number of months of financial support that the student has been granted on the grounds of the Profiling Fund (*profileringsfonds* - for special financial support to students) as referred to in paragraph 2a of the Higher Education and Research Act and the period granted or an extension of the performance-related grant due to a disability or chronic illness.
3. Partial tests and assignments which were passed will lose their validity if the course within which they were taken was not passed. Students who did not pass the course must complete the entire course again.
4. Contrary to the provisions of paragraph 1, the validity of a course of the premaster programme for students holding an hbo diploma lapses, if the premaster programme has not been completed within two years.

Art. 5.11 – right of inspection ³

1. For at least twenty working days after the announcement of the result of a written or digital test, the student who took the test will be allowed to inspect the marked work upon request. At request, a copy of that work will be provided free of charge ⁴.
2. During the period referred to in the first paragraph, the student who took the test may inspect the questions and assignments of the test concerned, as well as an explanation on which the mark was based.

³ Article 3.3 of the Regulations of the Board of Examiners provides for the right to subsequent discussion.

⁴ The questions and assignments are copyrighted.

Art. 5.12 – storage time tests

1. The assignments, their completion and the work assessed in the written or digital tests will be kept in paper or digital form for a period of two years following the assessment.
2. The graduation work and the assessment of this will be kept in paper or digital form for a period of seven years after this assessment.

Art. 5.13 – exemption

1. At the student's request, the Board of Examiners may, after consulting the examiner in question, grant the student exemption from a course if the student:
 - a. has completed an equivalent course of a university or higher professional study programme prior to the start of the Master's Degree Programme;
 - b. has demonstrated to have sufficient knowledge and skills in relation to that course through work or professional experience.
2. Exemptions for partial tests will not be granted.

Art. 5.14 – fraud and plagiarism

1. Fraud and plagiarism are defined as an action or failure to act on the part of students, whereby a correct assessment of their knowledge, insight and skills is made impossible, in full or in part.

Fraud includes:

- cheating during testing. The person offering the opportunity to cheat is an accessory to fraud;
- share answers with others while taking a test;
- seek the help of third parties during a test;
- to have direct access during the test to tools and resources, such as preprogrammed calculators, mobile phones, smartwatch, smartglasses, books, course readers, notes, etc., consultation of which is not explicitly permitted, unless the tools and resources are secured in a bag that remains closed during the entire test or otherwise made inaccessible;
- having others carry out all or part of an assignment and presenting it as their own work;
- gaining access to questions, exercises or answers of a test prior to the date or time that the testing takes place;
- perform (or try to perform) technical changes that undermine the online testing system;
- making up survey or interview answers or research data;
- wrongly signing or having another sign the attendance lists.

Plagiarism is defined as including data or sections of text (from others or own earlier work) in a thesis or other paper/assignment without quoting the source. Plagiarism includes the following:

- cutting and pasting text from digital sources such as encyclopaedias and digital publications without using quotation marks and referring to the source;
- cutting and pasting text from the internet without using quotation marks and referring to the source;
- using excerpts from texts of printed material such as books, magazines or other publications and encyclopaedias without using quotation marks and referring to the source;
- using a translation of the abovementioned sources without using quotation marks and referring to the source;
- paraphrasing the abovementioned texts without giving a (clear) reference: paraphrasing must be marked as such (by explicitly linking the text with the original author, either in text or a footnote), whereby the impression is not created that the ideas expressed are those of the student;
- using visual, audio or test material from others without referring to the source and presenting this as own work;
- resubmission of the student's own earlier work without source references, and allowing this to pass for work originally produced for the purpose of the course, unless this is expressly permitted in the course or by the lecturer;
- using the work of other students and passing this off as own work. If this happens with the permission of the other student, the latter is also guilty of plagiarism;

- in the event that, in a joint paper/assignment, one of the authors commits plagiarism, the other authors are also guilty of plagiarism, if they could or should have known that the other was committing plagiarism;
 - submitting papers obtained from a commercial institution (such as an internet site offering excerpts or papers) or having such written by someone else whether or not in return for payment.
2. a. If fraud or plagiarism is established or suspected, the examiner informs the student and Board of Examiners in writing.
 - b. The Board of Examiners gives the student the opportunity to:
 - respond in writing;
 - respond orally.
 3. The Board of Examiners will determine whether fraud or plagiarism has occurred or whether a case involves a student being an accessory to fraud or plagiarism and will inform the student of its decision in writing of the possible sanctions in accordance with the stipulations of the fourth paragraph, stating the possibility of appeal to the Examination Appeals Board.
 4. The Board of Examiners is authorised to impose sanctions. In doing so, the Board of Examiners shall ensure that the sanction is proportionate: the consequences of the sanction shall be in proportion to the degree and seriousness of the fraud or plagiarism committed.
 5. One or more of the following sanctions may be imposed, depending on the nature and extent of the fraud or plagiarism committed, and the circumstances in which the fraud or plagiarism was committed, as well as the student's study phase:
 - o invalidation of the paper or test submitted;
 - o reprimand, a note of which will be made in OSIRIS;
 - o removal from the course;
 - o no longer being eligible for a positive degree classification (cum laude) as referred to in article 6.2;
 - o exclusion from participation in tests belonging to the course concerned for the current academic year, or for a maximum period of 12 months;
 - o complete exclusion from participation in all tests for a maximum period of 12 months.
 6. In the case of extremely serious and/or repeated fraud or plagiarism, the Board of Examiners may recommend that the Executive Board permanently terminate the concerned student's registration for the programme.
 7. If the Board of Examiners establishes that large-scale or organised fraud is involved such that the test results as a whole will be affected, the Board of Examiners will declare without delay that the relevant test is invalid and that all participants must resit the entire test in the short term. At that time, the Board of Examiners will set the date on which the test must be resat. This date will be a maximum of ten working days after the fraud was established, allowing participants to benefit by preparing for the examination.

Art. 5.15 – dictionary

The examiner of a course can decide that each student may consult a translation dictionary during the test.

SECTION 6 – EXAMINATION

Art. 6.1 – examination

1. As soon as the student has fulfilled the requirements of the examinations programme, the Board of Examiners will determine the result of the examination and award a degree certificate as referred to in Art. 6.4.
2. Prior to determining the examination result, the Board of Examiners may examine the student's knowledge of one or more components or aspects of the study programme, if and in so far as the results of the relevant tests give them reason to do so.
3. Assessment of the examinations file constitutes part of the final examination. The date of examination will be the last working day of the month in which the Board of Examiners has determined that the student has fulfilled the requirements of the examinations programme. The student must be registered for the study programme on the date on which the examination is held.
4. The examination will be passed on condition that all courses have been passed.
5. A further condition for passing the examination and receiving the certificate is that the student was registered for the course during the period in which the tests and the examination were taken. If the student does not fulfil this condition, the Executive Board may issue a statement of no objection in relation to the passing of the examination and the issue of the certificate, after the student has paid the tuition fees and administration charges owing for the 'missing' periods.
6. Students who have passed their examination and therefore are entitled to be awarded a certificate, may request that the Board of Examiners delay the granting of the certificate and the examination date as referred to in the third paragraph. Such a request must be submitted within ten working days after the students have been informed of the examination results, stating the date on which the students wish to receive the certificate. The Board of Examiners will grant the request if the student:
 - plans to fulfil a management position for which Utrecht University has provided a board activities grant;
 - plans to do an internship ⁵, or take a course of a study programme abroad ⁶.The examination date may be postponed once only, for the duration of a maximum of thirteen months.

Art. 6.2 – cum laude judicium

A Master's degree may be awarded with distinction (*cum laude*). To achieve this distinction, students must have obtained the following requirements:

- a weighted average of at least an 8.0, without rounding up, for all courses of the Master's degree programme. This weighting is based on the credits;
- the weighted average mark is calculated using the final marks for the courses of the degree programme;
- the OSIRIS database may not include a course with a final mark lower than 7.0;
- at the first assessment the mark for the Master's (research) project ⁷ must be 8.0 or higher;
- the initial mark for the work placement, if applicable, must not be lower than 8.0;
- the final examination of the Master's Degree Programme has been passed within one year. Students of the part-time Educational Sciences programme must have passed the examination within two years.

Exemptions and courses passed abroad that are recorded in OSIRIS with an alphanumerical result in accordance with Art. 3.7, do not count towards a degree with distinction.

If the above regulations are not applicable, the Board of Examiners reserves the right to make the final decision.

⁵ The internship must be an official education course, completed as part of the Master's examination.

⁶ The course abroad must be followed in the semester immediately following the semester in which the requirements of the examination program are met.

⁷ If the Master's (research) project consists of more than one course, the weighted average of all of the courses must be at least 8.0 without rounding up. Marks are weighted based on the number of credits.

Art. 6.3 – degree

1. The Master of Science degree will be awarded to the student who passes the examination.
2. The degree awarded will be noted on the examination certificate.

Art. 6.4 – degree certificate

1. The Board of Examiners will award a certificate as proof that the examination was passed. One certificate will be issued for each degree programme, even if a student completes several study programmes.
2. The Board of Examiners will add the International Diploma Supplement in the English language to this certificate, which provides insight (internationally) into the nature and contents of the completed study programme.

Art. 6.5 – grading tables

1. The International Diploma Supplement gives the student's weighted average final mark and an ECTS Grading Table.
2. The weighted average mark represents the academic performance of the student on a scale of 1 to 10. It is calculated on the basis of the applicable numerical results for the courses the student has passed within the examination programme. Courses that have not been assessed numerically do not count towards the calculation. Weighting is on the basis of the credits per course.
3. The ECTS Grading Table makes the grading culture of Utrecht University clear to foreign education institutions and foreign employers, who can then convert the marks into their own grading system on the basis of the Grading Tables. The ECTS Grading Table is an institution-wide table for all Master's degree programmes. This table uses a ten-point scale, where only the marks from six to ten are shown because only passes are shown in the Grading Table. The marks are expressed in whole or half-marks. The percentage given with the mark indicates how often this mark is awarded.
4. The calculation of the ECTS Grading Table is on the basis of all valid passes (except alphanumerical results), not weighted according to study load, in the three most recent academic years, of students who were actively registered for a Master's degree programme at Utrecht University.

SECTION 7 – STUDENT COUNSELLING

Art. 7.1 – records of students’ progress

1. The faculty must record the individual study results of the students and make them available through OSIRIS-student.
2. A certified student progress file can be obtained at the Student information desk of the Faculty. Students can consult OSIRIS for an uncertified progress file.

Art. 7.2 – student counselling

1. The faculty must provide for counselling of the students who are registered for the study programme.
2. Student counselling encompasses:
 - assignment of a tutor who is tasked with;
 - promoting students’ sense of community;
 - assisting with programme choices;
 - assisting with exploration of the labour market.
 - referring and assisting students who encounter difficulties during their studies.

Art. 7.3 – disability and chronic illness

Disabled or chronically ill students will be offered the possibility to take courses and sit tests in the manner as laid down in their Education Facilities Contract. Requests to conclude a contract must be submitted to the Study Advisor.

SECTION 8 – TRANSITIONAL AND FINAL PROVISIONS

Art. 8.1 – safety-net scheme

In cases for which these Education and Examination Regulations do not provide, do not clearly provide, or lead to obviously unreasonable outcomes, a decision will be taken by or on behalf of the dean, after having heard the Board of Examiners. If the decision is part of the legal competences of the Board of Examiners, the dean will send the request to the Board of Examiners to deal with.

Art. 8.2 – transitional provisions

The transitional provisions are listed in Annex 3.

Art. 8.3 – amendments

1. Amendments to these rules will be laid down by the dean after they have been approved by the Educational Committee and the Faculty council, in a separate resolution.
2. An amendment to these rules is not to be applied to the current academic year, unless it is reasonable to assume that it will not harm the interests of the students.
3. Nor may an amendment have an adverse effect for students on any other decision taken pursuant to these Regulations by the Board of Examiners with respect to a student.

Art. 8.4 – publication

The dean will provide for the publication of these Regulations, as well as each amendment, on internet.

Art. 8.5 – effective date

These Regulations take effect on 1 September 2021.

Part 2

AIM OF THE DEGREE PROGRAMME

INTERDISCIPLINARY SOCIAL SCIENCE:

Study programme Youth Studies and Study programme Social Policy and Public Health

Learning outcomes:

Knowledge and insight

Graduates of the Interdisciplinary Social Science Master's programme have knowledge of and insight into:

- current developments occurring in modern societies
 - in the experiences of young people (YS) or
 - in the domain of health and wellbeing (SPPH)
- disciplinary and interdisciplinary theories and models that can be applied in the investigation of
 - issues relating to young people (YS), or
 - issues relating to the domain of health and wellbeing (SPPH);
- the research methods and strategies that are applied in a sound examination of these issues;
- the theory formulation on the
 - social context of influencing and promoting youth development (YS)
 - organisational context of social policy and interventions (SPPH).

Applying knowledge and insight

Graduates of the Interdisciplinary Social Science Master's programme are able to:

- analyse complex social issues from a variety of theoretical perspectives and relate them to concepts that play a role in the study of
 - young people in a variety of societal and institutional contexts (YS), or
 - health and wellbeing (SPPH);
- combine the basic principles of the various disciplinary perspectives in an interdisciplinary approach and apply them to the above-mentioned issues;
- conduct independent research and convey conclusions about it clearly and unambiguously, both orally and in writing, to a public of specialists and non-specialists, and to indicate the knowledge, motives and considerations on which these are based;
- incorporate the relationship between policy/intervention, management and level of implementation in the analysis, evaluation and implementation of policy-related and intervention practices.

Forming judgements

Graduates of the Interdisciplinary Social Science Master's programme:

- are able to engage in critical reflection on existing social relationships as well as on policy and intervention practices, based on theoretical, analytic and methodological considerations;
- are able to engage in critical reflection on their own actions as academic professionals in relation to clients, research participants, interventions and policy;
- are able to arrive at academically justified judgements in complex and/or relatively unfamiliar societal situations;
- consider the ethical aspects of the application of academic knowledge in the professional field.

Communication

Graduates of the Interdisciplinary Social Science Master's programme are able to:

- function appropriately as social scientists, particularly with regard to approaching and establishing working relationships with clients and/or research participants and colleagues and answering to them for their professional actions and conclusions;
- communicate clearly and unambiguously, both orally and in writing, with a public of specialists and non-specialists, reporting on the results of academic empirical research.

Graduates of the Interdisciplinary Social Science Master's programme demonstrate:

- an honest and critical position in relation to research plans and results;
- a respectful and responsible attitude towards students, colleagues, respondents, clients et cetera.

Learning skills

Graduates of the Interdisciplinary Social Science Master's programme are able to:

- describe or present in another form the results of an academic analysis in a sound manner;

- operationalise social-science theories and concepts for the purposes of a research proposal that can be implemented;
- learn from literature, lectures on knowledge and skills, and feedback on their own academic and professional activities;
- conduct academic research in a team;
- assess the academic work of colleagues and provide academically sound constructive commentary on it;
- develop and implement policy and intervention proposals in a complex organisational context, taking account of the specific characteristics of the actors involved.

CULTURAL ANTHROPOLOGY:

Study programme Sustainable Citizenship

The Cultural Anthropology Master's Programme Sustainable Citizenship prepares students to independently analyse and solve complex practical issues and research questions in various contexts using current research knowledge, skills and (ethical) reflection.

In this process, they learn to create a link between research knowledge and practical issues, they develop awareness of the contextual certainty of practical issues and they work on developing a professional identity.

Through an elective, students learn to adopt an interdisciplinary perspective in delving into practical issues and research questions as well as the related context inside and outside their own field.

Translation of the aim into exit qualifications:

Knowledge and understanding

The graduates have knowledge and understanding of:

- the most important current developments related to the theme of the master's;
- the most important theories and models which are applied in examining the issues of cultural diversity and sustainable citizenship;
- the characteristics of different domain-specific problem contexts in interaction with the social, cultural and political context of practical issues;
- the social, cultural and political contexts as dynamic systems with a focus on the individual, group, organisation and society;
- the interdisciplinary offering for delving into the content inside and outside the student's own field in relation to practical issues – as well as research questions and the context thereof;
- the research methods and strategies which are applied in the responsible examination of the theme of the Master's.

Application of knowledge and understanding

The graduates are able to:

- analyse complex issues from an (interdisciplinary/comparative) theoretical perspective and relate them to scientific and societal debates;
- independently apply theoretical, methodological and practical insights in the implementation of a research proposal;
- carry out independent research, draw conclusions from this research and clearly and unambiguously communicate these conclusions in writing and verbally to an audience of specialists and non-specialists;
- create a link between scientific knowledge, practical issues and research questions.

Opinion forming

The graduate can:

- reflect on developments and discussions in science and society concerning cultural diversity and sustainable citizenship based on well-founded theoretical, analytical, methodological and practical considerations;
- critically reflect on independently gathered data on core themes related to cultural diversity and sustainable citizenship based on theoretical, methodological and practical considerations;
- think critically about the professional ethics of anthropologists within a broad societal context;
- take an honest and critical position concerning research projects and results.

Communication

The graduates are able to:

- communicate and write in English at an academic level;
- write a master thesis in English;
- communicate scientific knowledge and insights in the area of cultural diversity and sustainable citizenship to fellow academics through written reports in articles and papers and verbal and written expression of scientific and current debates of their own research results related to practical issues, with a view to contributing to practical developments;
- make scientific discussions accessible to a broader audience by drawing (policy) conclusions from personal individual research related to practice and applying these to a tangible subject in the field of cultural diversity and sustainable citizenship.
- communicate and interact in practice;

Learning skills

The graduates are able to:

- reflect on the development of their own professional identity and attach associated consequences by developing their own competences (life-long learning);
- reflect on the discipline in ethical terms;
- undertake to act in a positive way as an academic professional with respect to ethical aspects;
- become part of the social context, taking into account the relevant stakeholders and act with scientific and professional integrity.

EDUCATIONAL SCIENCES:

Study programme Educational Sciences

The following is intended with the programme:

The aim of the study programme is to educate students to become academic professionals, who, as experts in the field of learning, can actively apply academic knowledge in practice and contribute to the development of the profession. The study programme aims to develop subject-specific expertise in three educational areas, namely: (1) the development and assessment of expertise; (2) the design of learning environments, educational materials and teaching modules; and (3) professionalisation and consultancy in educational and other organisations (mainstream education, vocational education and company training courses).

Translation of the aim into exit qualifications:

Knowledge and understanding

1A. Methodological/statistical: Graduates have knowledge and understanding of:

- the analysis of current academic knowledge and the formulation of a research question;
- research design;
- data collection and analysis;
- reporting and critical discussion of research results;
- academic integrity.

1B. Educationally substantive: Graduates have knowledge and understanding of the field of education and learning, at the level of the individual and the organisation. It concerns the integration of academic knowledge and insight in various theoretical domains, including:

- theories of expertise;
- theories of learning;
- theories of instruction;
- theories of assessment and evaluation;
- theories of organisational development;
- educational ethics.

Next to knowledge and understanding with regard to academic research, this programme yields knowledge of and understanding of the multidisciplinary domain of educational sciences including educational design, assessment and professionalisation in organisations. In addition, knowledge of and understanding of current educational issues plays an important role. The level of knowledge and insight has both a deepening and broadening aspect. Working in professional practice requires a broad foundation to be able to plan, manage and coordinate educational projects effectively. To conclude, graduates of the Master's programme in Educational Sciences have knowledge understanding of the methodology and theory formulation of educational design and implementation, assessment and quality requirements, professionalisation, quality improvement and organisational change, as well as knowledge of and insight into recent developments, and urgent and current issues and problems in these areas.

Application of knowledge and understanding

2A. Methodological/statistical: Graduates are able to:

- analyse current academic knowledge and formulate a research question;
- construct a research design;
- collect data and analyse the result;
- report and critically discuss research results;
- conduct research in line with codes of conduct for academic integrity.

2A: Educationally substantive: Graduates are able to:

- systematically analyse learning, educational and organisational problems;
- design relevant learning environments;
- advise on the implementation of learning environments and organisational change;
- develop and evaluate policy, instruments and procedures concerning testing and assessment;
- deal with dilemmas related to educational integrity/ethics.

The application of knowledge and insight requires academic and educational skills from the educational scientist. Graduates of the Master's programme in Educational Sciences are able to:

- analyse complex issues in the area of educational design, assessment and professionalisation in organisations from multiple theoretical perspectives, and link them to academic and social debates and (inter)national educational research;
- interpret results of existing research and apply them to the professional practice at the academic level;
- use skills in the area of design methodology, testing and evaluation, and development of professionalisation tracks in an academically responsible manner;
- conduct independent research in the area of educational design, assessment and professionalisation in organisations, while choosing methods that are suitable for complex case studies and realistic practical situations;
- plan, manage and coordinate educational projects, and implement innovations.

Opinion forming

Graduates are able to:

- reflect critically: they can approach the educational sciences critically and are capable of independently forming opinions on the educational sciences;
- identify false claims in the discipline specific literature and disprove them, and can adopt a critical stance regarding trends and hypes within the discipline;
- have insight into and a positive attitude towards the ethical aspects of an academic professional's conduct.

The ability to form a balanced judgement while taking into account social and ethical responsibilities is an integral part of the work of an educational scientist. This involves carefully weighing up different, sometimes conflicting, interests when dealing with various stakeholders (clients, learners, research subjects and other parties). Graduates of the Master's programme in Educational Sciences are able to:

- act responsibly as a professional and reflect critically on the effects of their conduct on other parties;
- critically reflect on information that they have gathered themselves based on theoretical, methodological and social considerations;
- reflect critically on academic and social developments and discussions relating to current issues in educational design, assessment and professionalisation in organisations on the basis of well-founded theoretical considerations substantiated by research, as well as critically examining their own views and insights on the basis of recent developments;
- reflect critically on the professional ethics of academics in the wider social context of accumulating and applying knowledge.

Communication

Graduates of the Master's programme in Educational Sciences are able to communicate about educational research and academically-based educational practice with partners within and outside the academic world by means of:

- oral presentations;
- various forms of written communication (academic articles, blogs, policy documents, project plans, poster presentations, etc.);
- substantiated discussions and collegial (multidisciplinary) cooperation.

Effective and clear communication concerning the design, judgement or advice to the client, other professionals and stakeholders is of essential importance in the work of the educational scientist. Professional reporting (oral or written) implies a clear structure, explicit use of sources, a theoretical and methodological foundation, a systematic assessment of arguments and transparency in conclusions or advice and thus requires graduates to possess academic writing skills. Graduates of the Master's programme in Educational Sciences are able to:

- cooperate with other educational scientists, lecturers, professional experts, clients and other stakeholders;
- communicate academic knowledge and insights in the area of educational design, assessment and professionalisation in organisations to other educationalists, students in higher education, clients and other stakeholders through written reports in articles and papers, and express orally academic knowledge, insights, debates and their own research results;
- translate academic discussions, publications of academic research and the results of their own research into tangible activities or policy conclusions using academic writing skills.

Learning skills

Graduates are able to:

- further develop their expertise independently. Lifelong learning and personal development are an essential part of their professionalism. Graduates are able to reflect critically on their own work and the work of others and are open to new insights (self-management);
- draw conclusions from critical reflection on their own work in order to augment their own skill set (career and job market orientation).

For professional practitioners, a critical and reflective academic attitude towards the development of their own expertise and professionalism and recognising and fulfilling their learning needs is essential for continuing to work in the field in an academically and ethically sound manner.

Graduates of the Master's programme in Educational Sciences are able to:

- keep themselves informed of academic literature and developments in the area of educational design, assessment and professionalisation in organisations (through the use of digital and non-digital resources);
- learn from personal communication and feedback;
- shape their own careers by demonstrating the willingness and ability to further develop their own competences, and by contributing to their field (and the development of it).

PEDAGOGICAL SCIENCES:

Study programme Youth, Education and Society

The following is intended with the programme:

- to acquire specialised knowledge, skills and understanding in the field of youth and education as related to societal issues. The specialised skills concern:
 - analysing issues of youth and education in the context of societal perspectives based on scientific insights;
 - conducting and evaluating scientific research;
 - designing, carrying out and evaluating policy and interventions geared toward youth and education as related to societal issues.
- preparing for scientifically informed practice as pedagogical professional in the area of youth and education as related to societal issues.

Translation of the aim into exit qualifications:

Knowledge and understanding

Graduates of the Master's programme in Youth, Education and Society have knowledge and an understanding of:

- the key current issues in the field of Youth, Education and Society, including those in which the student gains practical experience during the Master's programme. Objects of study are collective behaviour (behaviour of young people, parents, professionals), pedagogical infrastructures (systems of childcare, education, care, sports, recreation), policy and regulations as related to Youth, Education and Society and public opinion and public debates related to youth, education and society;
- theories and models in the field of Youth, Education and Society, that build on the knowledge gained during the Bachelor's programme and surpasses/intensifies the final level of the Bachelor's programme. This concerns knowledge of theories on collective behaviour and effective strategies for changing collective behaviour; knowledge of theories on organisations and effective strategies for innovation in organisations; knowledge of theories on policy, policy development and effective strategies for policy change. Moreover it concerns knowledge of the different paradigmatic approaches in these fields;
- the way in which interventions, programmes and policies with regard to (inter)national social and pedagogical issues are designed, evaluated and analysed;
- how theories and models, as well as interventions, programmes and policies in the field of youth, education and society can be applied in an intercultural, comparative and global context;
- ethical aspects of performing at the level of an academic professional, including those related to issues of diversity, inequality and inclusion;
- the position of theories, topics, interventions, policies and research related to Youth, Education and Society in an internationally comparative perspective.

Application of knowledge and understanding

Graduates of the Master's programme Youth, Education and Society are able to:

- analyse issues of Youth, Education and Society as an interaction of various socio-ecological systems, both theoretically and empirically;
- analyse (the pedagogical principles underlying) policy papers, legislation, regulations and public debates on (inter)national issues in the domain of Youth, Education and Society;
- design, carry out and evaluate pedagogical and educational interventions, at project, system and policy levels;
- steer organisations and networks of organisations, and coordinate professionals;
- report on analysis, intervention and evaluation for scientific, professional, and public administration/political audiences;
- analyse (inter)national issues of Youth, Education and Society based on scientific insights;
- conduct and evaluate scientific research;
- apply current ethical norms when designing, carrying out and evaluating scientific research at the level of an academic professional, both scientifically and professionally, including those related to issues of diversity, inequality and inclusion;
- design, carry out and evaluate policy and interventions geared towards (inter)national and global issues of youth, education and society.

Opinion forming

Graduates of the Master's programme in Youth, Education and Society are able to:

- contribute in a critically reflective way to public debates on (inter)national issues of youth, education and society in popular media;
- reach a scientifically valid opinion on complex and/or relatively unknown situations in the field.

Communication

Graduates of the Master's programme in Youth, Education and Society demonstrate:

- an honest and critical attitude concerning research projects and results;
- a respectful, business-like and responsible attitude towards (culturally diverse) colleagues, clients, respondents and the general public.

Learning skills

Graduates of the Master's programme in Youth, Education and Society have:

- insight into and the ability to reflect on their own conceptual framework, their own academic schooling and social position, taking account of different social and cultural contexts;
- the willingness to continue to learn, further develop themselves and contribute to the field of study as their career progresses;
- an understanding of and the ability to reflect on their own learning process and academic career, and the ability to link consequences to both by adding to their competencies.

Study programme Clinical Child, Family and Education Studies

The following is intended with the programme:

- provide specialised knowledge, insight and skills in the area of socialization and development issues, education or youth care, concerning:
 - conducting and evaluating scientific research;
 - using diagnostic models and techniques;
 - implementing and/or evaluating pedagogical interventions;
 - analysing existing socialization and development issues;
 - formulating and evaluating practical innovations.
- preparing for scientific professional practice from a transnational perspective.

Translation of the aim into exit qualifications:

Knowledge and understanding

Graduates from the Master's programme in Clinical Child, Family and Education Studies have knowledge and an understanding of:

- the key current issues in the field of Clinical Child, Family and Education Studies, including those in which the student gains practical experience during the Master's programme;
- theories and models applied in the field of Clinical Child, Family and Education Studies, in which this knowledge builds on the knowledge gained during the Bachelor's and the premaster's programme and surpasses/intensifies the final level of the Bachelor's programme;
- methods and programmes for care and assistance to prevent and provide support and treatment in problematic socialization situations;
- important frameworks and procedures in care, education and other pedagogical facilities that apply to the field of Clinical Child, Family and Education Studies;
- ethical aspects of performing at the level of an academic professional.

Application of knowledge and understanding

Graduates of the Master's programme in Clinical Child, Family and Education Studies are able to:

- analyse complex issues from multiple theoretical perspectives and relate these to concepts that play a role in the fields of Clinical Child, Family and Education Studies;
- carry out independent research, draw conclusions from this research as well as the knowledge, motives and considerations that underlie it and clearly and unambiguously communicate these conclusions in written and verbal form to an audience of specialists and non-specialists;
- master skills that may relate to diagnostics, treatment, treatment coordination, care innovation, policy and prevention, and apply these in a socially responsible way, taking account of the specific cultural context and transnational comparisons;
- apply ethical aspects of performing at the level of an academic professional, both scientifically and professionally.

Opinion forming

Graduates of the Master's programme in Clinical Child, Family and Education Studies are able to:

- critically reflect on current practices based on theoretical, methodological, diagnostic and intervention strategic considerations, while taking consideration of the specific cultural context;
- form a scientifically responsible opinion in complex and/or relatively unknown situations in the field;
- form an opinion and critically reflect on their professional actions, both in the practice of Clinical Child, Family and Education Studies and in scientific research.

Communication

Graduates of the Master's programme in Clinical Child, Family and Education Studies are able to:

- function adequately within the frameworks of the professional codes of the field in question, including adequate written and verbal communication with professionals in the practice of Clinical Child, Family and Education Studies;
- present acquired competencies that align with labour market needs in both verbal and written form.

Graduates of the Master's programme in Clinical Child, Family and Education Studies demonstrate:

- an honest and critical attitude concerning research projects and results;
- a respectful, responsible, culturally sensitive, professional and customer-oriented attitude towards students, colleagues, respondents, clients, etc.

Learning skills

Graduates of the Master's programme in Clinical Child, Family and Education Studies have:

- an understanding of and the ability to reflect on their own learning process and academic career development, and the ability to link consequences to both by adding to their competencies;
- the attitude to continue learning, further develop themselves and contribute to the field of study as their career progresses.

PSYCHOLOGY:

The following is intended with the master programme:

- provide specialised knowledge, skills and insight in the area of Psychology , and achieve the final qualifications stated in the second paragraph.
- prepare students for the professional field as academic professional and further research training programmes in Psychology in general and, specifically, in the field of Applied Cognitive Psychology, Clinical Child and Adolescent Psychology, Clinical Psychology, Neuropsychology or Social, Health and Organisational Psychology.

Translation of the aim into exit qualifications:

Knowledge and understanding

The master Psychology provides graduates with knowledge and understanding of:

- recent developments and the current state of affairs of scientific knowledge in the area of Psychology;
- the professional field(s) and problem context in which scientific knowledge of Psychology is applied;
- assessments and psychodiagnostics that are used in the professional field and the theories underlying these assessments;
- intervention strategies that are used in the professional field and the theories underlying these strategies;
- customary methods of scientific research in the area of Psychology.

Application of knowledge and understanding

Graduates of the Psychology Master are able to:

- demonstrate an advanced understanding of the applications of psychological knowledge within the field of Applied Cognitive Psychology, Clinical Child and Adolescent Psychology, Clinical Psychology, Neuropsychology or Social, Health and Organisational Psychology;
- use scientific knowledge in the area of Applied Cognitive Psychology, Clinical Child and Adolescent Psychology, Clinical Psychology, Neuropsychology or Social, Health and Organisational Psychology to adequately analyse psychological issues in the relevant field of study;
- implement assessments and psychodiagnostics in the relevant professional area at a basic level;
- implement and evaluate intervention strategies used in the professional field at a basic level;
- set up, implement and report on scientific research in the relevant area.

Opinion forming

Graduates of the Psychology Master are able to:

- consider, in a critically reflective way, the consequences and ethical aspects of their own professional actions with respect to people in general and patients, clients and research participants as well as their direct environment in particular;
- keep in mind the ethical aspects of application in Psychology, including research;
- demonstrate understanding of the awareness of limited knowledge and skills, and act accordingly;
- take a critical view of psychological knowledge and practice, particularly in view of scientific standards for argumentation and proof.

Communication

Graduates of the Psychology Master are able to:

- approach people in general and patients, clients and/or research participants and colleagues in particular, establish a working relationship and hold themselves accountable to them for their professional actions and conclusions;
- transfer professional knowledge to colleagues and people outside the field, particularly related to topics in the chosen professional field;
- report both in verbal and written form on empirical research.

Learning skills

Graduates of the Master Psychology are able to:

- learn from scientific literature, from oral transfer of knowledge and expertise, and from feedback on their own academic and professional activities;
- learn at a self-directed and autonomous level.

The following is intended with the programme Applied Cognitive Psychology:

- enable students to develop in-depth knowledge and skills related to information-processing processes in the human brain and how these can be influenced by, for example, environment and cognitive load, as well as knowledge on how to advise on optimising information transfer based on prior knowledge and designing ergonomically sound interfaces.
- train students in applying fundamental knowledge and translating it into practical situations in the field of cognitive ergonomics (for example research into convenience for users, safety, human-computer interaction and human-environment interaction) and communication design and advising on optimising information transfer (for example: advising on campaigns, education, marketing, advertising etc.).

The following is intended with the programme Clinical Psychology:

- enable graduates to gain (specialised) psychological knowledge of problems in the area of mental health, to gain basic psychotherapeutic knowledge and skills, to gain training in the area of psychodiagnostics, and to explore behavioural therapy and cognitive therapy. This programme devotes special attention to the consequences of and interventions for anxiety disorders, depression, and conditions following major life events (trauma and grief). The programme strongly emphasises the acquisition of both the professional skills relevant to the practice of the profession in a practical setting and the academic skills needed to understand, develop and apply scientific insights. Therefore, a practical internship and empirical research form major parts of the Master's programme.
- prepare students for a career as academic professional in the field of clinical psychology, either as clinician, researcher or intervention/policy developer.
enable students to fulfil the requirements of the NIP registration in psychodiagnostics (provided that the necessary requirements during the Bachelor's phase are met, the internship fits the requirements, and the relevant reports are approved). enable students to enter various Dutch post-Master programmes (Health Care Psychologist programme, Psychotherapist programme, or programmes leading to membership in specialised psychotherapy associations) and international post-Master programmes (depending on accreditation by the national association of psychologists of the particular country), assuming they have fulfilled the necessary requirements during the Bachelor's phase and depending on the type of internship in the Master's phase.

The following is intended with the programme Clinical Child and Adolescent Psychology:

- enable students to gain in-depth knowledge, understanding, and skills (as described in the exit qualifications of the master Psychology) in the field of clinical child and adolescent psychology. This programme focuses on developmental processes relevant to optimizing normal development and adjusting problematic development in the child and adolescent period, with attention for the social context in which youth develop and evidence-based practices to prevent and/or treat problematic development.
- prepare students for a career as academic professional in the field of clinical child and adolescent psychology, either as clinician, researcher or intervention/policy developer.
- enable students to fulfil the requirements of the NIP registration in psychodiagnostics (provided that the necessary requirements during the Bachelor's phase are met, the internship fits the requirements, and the relevant reports are approved) and to register in the professional register for youth professionals (SKJ).
- enable students to enter various Dutch post-Master programmes (such as Health Care Psychologist programme, Psychotherapist programme, School psychology programme, or NIP Child and Adolescent Psychology), or international post-Master programmes (depending on accreditation by the national association of psychologists of the particular country), assuming they have fulfilled the necessary requirements during the Bachelor's phase and depending on the type of internship in the Master's phase.

The following is intended with the programme Neuropsychology:

- enable students to gain in-depth knowledge, understanding, and skills (as described in the exit qualifications of the master Psychology) in the field of Neuropsychology. This programme focusses on how the brain subserves psychological functions such as perception, memory, thinking, language processing, attention, motivation and emotion and in particular on the cognitive and behavioural consequences of brain dysfunction. The programme strongly emphasises the acquisition of both the professional skills relevant to the practice of the profession in a practical setting and the academic skills needed to understand, develop and

apply scientific insights. Therefore, a practical internship and empirical research form major parts of the Master's programme.

- prepare students for a career as academic professional in the field of neuropsychology, either as clinician, or researcher.
- enable students to fulfil the requirements of the NIP registration in psychodiagnostics (provided that the necessary requirements during the Bachelor's phase are met, the internship fits the requirements, and the relevant reports are approved).

enable students to enter Dutch post-Master programmes such as the Health Care Psychologist programme, or international post-Master programmes (depending on accreditation by the national association of psychologists of the particular country), assuming they have fulfilled the necessary requirements during the Bachelor's phase and depending on the type of internship in the Master's phase.

The following is intended with the programme Social, Health and Organisational psychology:

- prepare graduates for a career as an academic professional in the domain of Social, Health and/or Organisational Psychology. This programme devotes special attention to the social influence of behaviour and attitudes, health behaviors, and to individual behaviour in relation to work and work organisations. Graduates are able to integrate advanced understanding of practical issues with their knowledge of theories, empirical insights and methods in Social, Health, and/or Organisational psychology and systematically unravel practical issues, in a social, health or organisational context. They subsequently select and implement the most appropriate, evidence-based methods to solve these issues. The outcomes of these steps generate input for knowledge development in the academic or practice domain within Social, Health, and/or Organisational psychology, and trigger new questions for empirical research. Throughout the programme, full attention is given to the development of a professional identity as Social, Health or Organisational Psychologist.
- prepare graduates for a position as a behaviour specialist, consultant, researcher or intervention/policy developer at an academic level.

SOCIOLOGY:

Study programme Contemporary Social Problems

The objective of the programme is to train academic professionals who, in view of their sociological knowledge and associated ethical reflection, can contribute to mapping out, analysing and solving topical social problems in various contexts (government, corporate).

In this process, they learn to independently carry out application-oriented social science research and to create *cohesion* between scientific knowledge and practical issues, and they develop awareness of *the contextual certainty* of practical issues as well as working on the development of a *professional identity*.

Through an elective and a track course from another discipline, they learn to adopt an interdisciplinary perspective in exploring the relationship between research questions and practical issues as well as the related context inside and outside their own field.

Translation of the aim into exit qualifications:

Knowledge and understanding (in the area of defining problems, theories, research and policy)

The graduate has knowledge and understanding of:

- important theories and models for examination of current social issues; specific knowledge and understanding in relation to one of the tracks on offer, specifically:
 - Essentials of care track: key concepts from the governance & network theory in relation to health issues;
 - Crime and Safety track: key concepts in criminology in relation to public security issues;
 - Internet, Social Media and Networking track: key concepts from social network theory in relation to social issues.
- sectoral and international comparative research on, for example, policy and organisation.
- scientific and field practice developments within a social sector or organisation.
- the key characteristics of different domain-specific areas and problem contexts.

Application of knowledge and understanding

The graduate is able to:

- analyse complex questions from a sociological/interdisciplinary/comparative theoretical perspective and relate these to scientific and social debates.
- translate/apply new and previously acquired socio-scientific knowledge to current social issues.
- operationalise theoretical, methodological and practically-oriented understanding in a feasible research proposal.
- carry out independent research, draw conclusions from it in written and spoken form in a clear, straightforward manner to present to an audience of specialists and non-specialists.
- create a link between scientific knowledge, research questions and practical issues.
- provide a client with responsible advice on policy or organisation.

Form judgements (about scientific, societal and ethical aspects)

The graduate is able to:

- reflect on developments and discussions in science and society with regard to current social issues, on the basis of well-founded theoretical, analytical, methodological and practice-oriented considerations.
- critically reflect upon information they have gathered themselves on current social issues based on theoretical, methodological, practice-oriented and social considerations.
- adopt an honest and critical position in relation to research plans and results.
- think critically about the professional ethics of people working in sociology within a wide social context.
- think critically about the professional ethics of actors in the professional field.
- make a sound assessment of the scientific quality of proposed measures and of the organisational, political and administrative and social practicality of the policy and organisation advice formulated.

Communication

The graduate is able to:

- report, independently and in an academically sound way, on their own activities and present clear recommendations to interested parties both verbally and in writing.
- skilful communication and interaction with colleagues and others working in the professional field.
- report the results of their own research, or advice, to clients or others working in the field verbally and in writing in a clear and structured manner.
- critique and comment on reports by fellow students, others working in the field, colleagues and clients in a constructive manner.
- translate scientific debates for a wider audience by drawing conclusions on, for example, policy from their own practical research into a concrete subject within a current social issue.

Learning skills

The graduate is able to:

- reflect on the development of their professional identity and take action on this by developing their own competencies (lifelong learning).
- reflect upon professional ethical issues within their professional field.
- deal with ethical aspects in a well-considered manner as an academic professional.
- be part of the social context, taking into account the parties concerned and thus deal with them with integrity and in a scientific and professional manner.
- work independently in professional practice.
- collaborate with professionals from other scientific disciplines.

ANNEX

Annex 1 - Premaster programme (Art. 2.4)

Annex 1.1 - INTERDISCIPLINARY SOCIAL SCIENCE

Premaster programme Social Policy and Public Health

Admission to the premaster programme Interdisciplinary Social Science: Social Policy and Public Health:

The holder of a Dutch bachelor degree of a University of Applied Sciences (hbo) worth 240 credits as mentioned below will be admitted to the premaster programme Social Policy and Public Health.

CROHO-sector ^{8 9}	Programmes
Onderwijs	Lerarenopleiding basisonderwijs, Aardrijkskunde, Geschiedenis, Maatschappijleer
Gedrag en maatschappij	All
Gezondheidszorg	Verpleegkunde (hbo-V) Psychomotorische therapie Ergotherapie Sport, gezondheid, management Leefstijl, arbeid en gezondheid Sociale gerontologie
Economie	All

Content of the premaster programme Interdisciplinary Social Science: Social Policy and Public Health:

- Health in Society (7.5 credits)
- Basis van onderzoeksmethoden en statistiek (BOS) (7.5 credits)
- Academic Skills (7.5 credits)
- Verdieping in onderzoeksmethoden en statistiek voor interdisciplinair sociaal wetenschappers (VOS ISW) (7.5 credits)
- Key Challenges to the Welfare State: Social Policy and Social Change (7.5 credits)
- Technieken voor analyse van kwantitatieve en kwalitatieve gegevens (TAK) (7.5 credits)
- Solidarity and Social Justice in Contemporary Societies (7.5 credits)
- Premaster Thesis (7.5 credits).

The premaster programme is partly offered in Dutch and party offered in English.

Premaster programme Youth Studies

Admission to the premaster programme Interdisciplinary Social Science: Youth Studies:

The holder of a Dutch bachelor degree of a University of Applied Sciences (hbo) worth 240 credits as mentioned below will be admitted to the premaster programme Youth Studies.

CROHO-sector	Programmes
Onderwijs	All
Gedrag en maatschappij	All
Gezondheidszorg	Verpleegkunde (hbo-V) Psychomotorische therapie Ergotherapie Sport, gezondheid, management Leefstijl, arbeid en gezondheid Sociale gerontologie

⁸ CROHO = Centraal Register Opleidingen in het Hoger Onderwijs. The hbo programmes Communicatie and Integrale veiligheidskunde are mentioned under the CROHO-sector Gedrag en maatschappij, although DUO does not mention the programmes in this sector.

⁹ Education and Health sectors students who are not specifically mentioned, but who feel their previous education and training is in line with the themes of the Master's programme Social Policy and Public Health can submit a request to the admissions committee to be admitted to the premaster's programme. They must submit a letter of motivation, which demonstrates and highlights the links between the course of higher professional education (hbo) completed and the premaster's programme.

Content of the premaster programme Interdisciplinary Social Science: Youth Studies:

- Risk Behavior and Addiction in Adolescence (7.5 credits)
- Basis van onderzoeksmethoden en statistiek (BOS) (7.5 credits)
- Academic Skills (7.5 credits)
- Verdieping in onderzoeksmethoden en statistiek voor interdisciplinair sociaal wetenschappers (VOS ISW) (7.5 credits)
- Adolescent Development (7.5 credits)
- Technieken voor analyse van kwantitatieve en kwalitatieve gegevens (TAK) (7.5 credits)
- Youth and Sexuality (7.5 credits)
- Premaster Thesis (7.5 credits).

The premaster programme is partly offered in Dutch and party offered in English.

Annex 1.2 – CULTURAL ANTHROPOLOGY

Premaster programme Sustainable Citizenship

Admission to the premaster programme Cultural Anthropology: Sustainable Citizenship:

The holder of a Dutch bachelor degree of a University of Applied Sciences (hbo) worth 240 credits as mentioned below will be admitted to the premaster programme Cultural Anthropology: Sustainable Citizenship.

CROHO-sector	Programmes
Onderwijs	All
Gedrag en maatschappij	All
Gezondheidszorg	All
Economie	All
Taal en cultuur	Cultureel erfgoed

Content of the premaster programme Cultural Anthropology: Sustainable Citizenship:

- Culturele antropologie 1: Inleiding in de Culturele Antropologie (7.5 credits)
- Methoden en technieken 1 voor hbo-instroom (7.5 credits)
- Wetenschappelijk schrijven (7.5 credits)
- Religion, Media and Popular Culture (7.5 credits) *is offered in English*
- Cultural Anthropology 3: History and Theory in Anthropology (7.5 credits) *is offered in English*
- Anthropology and Sustainability: Contemporary Fault Lines (7.5 credits) *is offered in English*
- Choise between:
 - o Cultural Anthropology 4: Globalization and Social Cultural Complexity (7.5 credits) *is offered in English*
 - o Etniciteit en nationalisme (7.5 credits)
- Position Paper Premasters (7.5 credits) *is offered in English.*

The premaster programme is partly offered in Dutch and party offered in English.

Annex 1.3 – EDUCATIONAL SCIENCES:

Premaster programme Educational Sciences

Admission to the premaster programme Educational Sciences:

The holder of a Dutch bachelor degree of a University of Applied Sciences (hbo) worth 240 credits as mentioned below will be admitted to the premaster programme Educational Sciences.

CROHO-sector	Programmes
Onderwijs	All
Gedrag en maatschappij	All
Gezondheidszorg	All

Content of the premaster programme Educational Sciences:

- Educational Psychology (7.5 credits)
- Basis van onderzoeksmethoden en statistiek (BOS) (7.5 credits)
- Academic Writing (7.5 credits)
- Methoden in onderwijswetenschappelijk onderzoek (7.5 credits)
- Ontwikkelen van assessment- en evaluatieinstrumenten voor onderwijssituaties (7.5 credits)
- Ontwerpen van leersituaties - gevorderd (7.5 credits)
- Leren in organisaties: veranderingsinterventies (7.5 credits)
- Research Methods and Skills (7.5 credits).

Annex 1.4 – PEDAGOGICAL SCIENCES

Premaster programme Youth, Education and Society

Admission to the premaster programme Pedagogical Sciences: Youth, Education and Society:

The holder of a Dutch bachelor degree of a University of Applied Sciences (hbo) worth 240 credits as mentioned below will be admitted to the premaster programme Pedagogical Sciences: Youth, Education and Society.

CROHO-sector	Programmes
Onderwijs	All
Gedrag en maatschappij	All
Gezondheidszorg	All

Content of the premaster programme Pedagogical Sciences: Youth, Education and Society:

- Cultural Diversity (7.5 credits)
- Opvoeding en maatschappij (7.5 credits)
- Basis van onderzoeksmethoden en statistiek (7.5 credits)
- Verdieping in onderzoeksmethoden en statistiek voor interdisciplinair sociaal wetenschappers (7.5 credits)
- Pedagogische systemen in de kindertijd en adolescentie (7.5 credits)
- Pedagogische praktijkontwikkeling, onderzoek en beleid (7.5 credits)
- Thesis Pedagogische wetenschappen (15 credits).

Premaster programme Clinical Child, Family and Education Studies

Admission to the premaster programme Pedagogical Sciences: Clinical Child, Family and Educational Studies:

The holder of a Dutch bachelor degree of a University of Applied Sciences (hbo) worth 240 credits as mentioned below will be admitted to the premaster programme Pedagogical Sciences: Clinical Child, Family and Educational Studies.

CROHO-sector	Programmes
Onderwijs	All
Gedrag en maatschappij	All
Gezondheidszorg	All

Content of the premaster programme Pedagogical Sciences: Clinical Child, Family and Educational Studies:

- Developmental Psychopathology (7.5 credits)
- Basis van onderzoeksmethoden en statistiek (7.5 credits)
- Verdieping in onderzoeksmethoden en statistiek voor pedagogen (7.5 credits)
- Test- en observatievaardigheden (7.5 credits)
- Diagnostiek (7.5 credits)
- Behandeling en interventie (7.5 credits)
- Thesis Pedagogische wetenschappen (15 credits).

Annex 1.5 – SOCIOLOGY

Premaster programme Sociology: Contemporary Social Problems

Admission to the premaster programme Sociology: Contemporary Social Problems:

Frontiers in Clinical Child, Family and Educational Studies (5 credits) or Psychotrauma and Loss (5 credits)	Frontiers in Clinical Child, Family and Education Studies: Research at Utrecht University and Transnational Comparisons (5 credits)

Annex 4. Language policy chosen for the degree programmes

All programmes are taught in English.

In accordance with the Executive Board of Utrecht University, the Faculty considers it important that students have skills to function in a globalised labour market. Consequently, English is the language of instruction in all the Master's programmes of the Faculty of Social and Behavioural Sciences.

English is increasingly becoming the lingua franca of international research and education. Moreover, renowned research is carried out in an international context and good international reputation attracts talent and builds strategic collaborations. At our faculty, we seek to emphatically link internationalisation with quality. We believe that internationalisation helps raise the quality of our education, research and social impact. This includes the education of the academic professionals and scientists of the future. Specifically, we wish to align with international academic standards and to broaden our horizon in the area of academic education and research.
