Description:

The "Tarquinia Project" is a LERU exemplary interdisciplinary research project designed to carry out global archaeological, cultural and historical research at a small (mobile finds), medium (archaeological contexts), large scale (territory). The project involves groups from the Università Statale di Milano (Archaeology, Information and Communication Technologies, Geoarchaeology), the Politecnico di Milano (Architecture and Topography), etc.

Our field-work is carried out in the ancient city of Tarquinia (90 hectares), which necropolis with the famous painted tombs is a UNESCO World Heritage Site (nominated 2004). Research includes the 'monumental complex', the Ara della Regina sanctuary, the fortifications, and previous archaeological sites explored during the 19th and in the first half of the 20th century, in a number of areas of the Civita plateau.
