

Go to: <https://osiris-student.uu.nl/>

Log in and go to Enrol:

Click on Course to enrol yourself for a course with the course code:

Choose the number of the tutorial you want to follow, but keep these rules in mind:

1. Check the definition of the tutorial (See remarks for repeater, free mover, honours). Choose a tutorial with the right definition i.e. one that is suitable for your situation. Regular tutorial groups do not have a remark. If you choose a wrong tutorial, the student desk will remove you from the tutorial you chose and place you in a tutorial with the right definition.
2. Do not choose more than one course in the same time slot.

Make sure you have received a confirmation e-mail in your students' mail and save this. It is proof of your course registration. If you have any problems during the registration, please contact the [Student Information Desk](#) as soon as possible.
